

45.2 Organization of hospital pharmacy services

In organizing hospital pharmacy services, both the way in which the staff is organized and the physical layout of the building must be considered.

Personnel

Hospital pharmacy personnel can be divided into three main categories—

1. **Management.** Management includes the chief pharmacist and sometimes deputy chief pharmacists, who are responsible for procurement, distribution, and control of all pharmaceuticals used within the institution and for management of personnel within the pharmacy department.
2. **Professional staff.** These professionals are qualified pharmacists who procure, distribute, and control medications and supervise support staff for these activities. In some facilities, pharmacists provide clinical consulting services and medication information.
3. **Support staff.** The support staff category often includes a combination of trained pharmacy technicians, clinical personnel, and messengers.

The smallest hospitals may have only two or three pharmacy staff members, with the chief pharmacist as the only pharmacist. Larger teaching hospitals that provide extensive pharmaceutical distribution and clinical services may have more than 100 staff members.

The cornerstone for a well-functioning medication system is an up-to-date manual of policies and procedures. Staff members should be familiar with the manual and adhere to it.

Physical organization

The extent of the pharmacy's physical facility is determined by the size of the hospital and the services provided. A large pharmacy department might have the following sections within one physical space or in separate locations throughout the hospital—

- Administrative offices
- Bulk storage
- Narcotic or dangerous drug locker
- Manufacturing and repackaging
- Sterile ointment compounding
- Inpatient and outpatient dispensing
- Medicine information resource center
- After-hours pharmacy
- Emergency medicine storage

Inpatient dispensing is sometimes done from satellite pharmacies throughout the hospital. In larger hospitals, satellite pharmacies are beneficial because they enable a shorter turnaround time for individual medication orders, especially in distribution systems that dispense medications packaged for individual patients. Satellites also increase the pharmacist's presence in the patient care area, facilitating interactions with medical staff, nursing staff, and patients, and thus ultimately improving patient care.

With satellite pharmacies, there is reduced need for stock stocks. However, each satellite requires a certain minimum inventory level of pharmaceuticals. A system with multiple satellites must likely have a higher total inventory level than that of a central pharmacy system. The higher inventory and additional personnel costs needed to staff satellite pharmacies may be justified by reductions in pharmaceutical supply costs (because there is less wastage) and improvements in patient care. Whether or not multiple satellite pharmacies serve inpatients, separate pharmacies often serve inpatients and outpatients. Figure 45-1 illustrates how a hospital pharmacy with separate inpatient and outpatient departments is organized in one African country.

45.3 Hospital drug and therapeutics committee

Most commonly, the committee designed to ensure the safe and effective use of medications in the hospital is the DTC. The American Society of Health-System Pharmacists' guidelines on DTCs state that "medication use is an inherently complex and dangerous process that requires constant evaluation. Organizations need to implement tools and processes necessary to meet the goals of using medications effectively and safely" (ASHP 2008).

Purpose and functions

The DTC promotes the rational use of medication through the development of relevant policies and procedures for medication selection, procurement, distribution, and use and through the education of patients and staff. Country Study 45-1 lists the functions of the DTC in an Afghan hospital.

In some hospitals, the DTC becomes overwhelmed with the difficulty of obtaining an adequate supply of medications. Members are caught up in routine decisions about which medications to buy, how much, and from whom, rather than focusing on long-term planning, policies, and programs for improving the safe and cost-effective use of medications. As discussed, in most settings, daily purchasing decisions can be handled by the chief pharmacist, with supervision by the DTC or another committee responsible for procurement.

Society Of Subordinates Inmate Organization In A Narcotic Hospital:

Society of Subordinates Charles R. Tittle,1972 Federal Probation ,1973 **Inmates' Narratives and Discursive Discipline in Prison** Jennifer Schlosser,2015-05-15 The question of what works in offender treatment has dominated the field of prisoner re entry and recidivism research for the last thirty years One of the primary ways the criminal justice system tries to reduce the rates of recidivism among offenders is through the use of cognitive behavioural programs CBP as in prison intervention strategies The emphasis for these programs is on the idea that inmates are in prison because they made poor choices and bad decisions Inmates thinking is characterized as flawed and the purpose of the program is to teach them to think and act in socially appropriate ways so they will be less inclined to return to prison after their release This book delves into the heart of one such cognitive behavioural programme examines its inner workings its effects on inmates narrated experience and considers what happens when a CBP of substandard quality and integrity is used as a gateway for inmates release Based on original empirical research this book provides realistic suggestions for improving policy for reforming current in prison programs engaging in problematic practices and for instituting alternatives that take the needs of the inmates into greater account This book is essential reading for students and academics engaged in the study of sociology criminal justice prisons social policy sentencing and punishment National Library of Medicine Current Catalog National Library of Medicine (U.S.),1973 First multi year cumulation covers six years 1965 70 **SNI Documents** National Criminal Justice Reference Service (U.S.),1978 *Prison Sex* Christopher Hensley,2002 Sex in prison remains a taboo subject This comprehensive volume explores prison sex presenting original research on consensual and nonconsensual intercourse as well as the effects of conjugal visitation policies and HIV AIDS management **Correctional Bookshelf** United States. Bureau of Prisons. Library,1977 **Document Retrieval Index** ,1974 **A Comprehensive Study of Female Offenders** Martin Guevara Urbina,2008 Few empirical studies have focused on women in prison In the last few years though a number of studies have demonstrated that there are fundamental differences between male and female prisoners in an ever changing penal system Consequently there has been a need for more comprehensive studies of female offenders for three primary reasons 1 imperative research gaps remain to be bridged 2 the female prison experience is not constant and 3 prison rates for female offenders especially minority offenders have increased considerably in the last few years A central goal of this book then is to provide a balance to the existing literature and research on female prisoners in the United States and to an extent abroad focusing primarily on female offenders and using data gathered from the Wisconsin Department of Corrections The book utilizes a comprehensive investigative approach by equating the experience of female offenders by the totality of circumstances within an historical institutional political and ideological context The critical objective is to offer an inclusive analysis of the things that are considered by female inmates to be the most significant before during and after their incarceration as a way of better understanding the reasons that lead to their first incarceration as well as subsequent

incarcerations By reading this book the reader will have a greater understanding of the many challenges facing female inmates as well as the relationship between inmates correctional officers and by extension society in general Also provided is a series of policy recommendations throughout the book particularly in the concluding chapter and epilogue *Prisons, Punishment and the Pursuit of Security* D. Drake, 2012-07-25 Drawing on research in men s long term maximum security prisons this book examines three interconnected problems the tendency of the prison to obscure other social problems and conceal its own failings the pursuit of greater levels of human security through repressive and violent means and the persistence of the belief in the problem of evil Theoretical Integration in the Study of Deviance and Crime Steven F. Messner, Marvin D. Krohn, Allen E. Liska, 1989-07-01 How to best generate theoretical growth in the contemporary study of deviance and crime has been the source of much debate This book represents a diverse range of viewpoints concerned about theoretical integration and its benefits The chapters encompass both discussion of the requisites for integrating theories and examinations of methodological strategies to test these theories By providing a source for those grappling with the issue of theoretical integration the book is sure to stimulate further theoretical development in the sociology of deviance and in criminology Prison Organization and Inmate Subcultures Charles Wellington Thomas, David M.
