Socio Economic Modelling And Forecasting In Developing Countries:

Socio-economic Modelling and Forecasting in Developing Countries Mirek Karasek, Waddah K. Alem, Wasfy B. Iskander, 1988 *Economic Activity and Land Use The Changing Information Base for Local and Regional Studies* Michael J. Healey, 2014-10-13 Concerned primarily with statistical data this text aims to provide a guide to the nature, uses, availability and limitations of the main data sources for interpreting and undertaking regional studies of economic activity. It also considers the methods used for the collection of this data.

The Socioeconomic Impact Of Resource Development F. Larry Leistritz, Steve H. Murdock, F. Larry Leistritz, 2019-06-26 Large scale industrial and energy development projects are profoundly affecting the social and economic climate of rural areas across the nation, creating a need for extensive planning information both to prepare for the effects of such developments and to meet state and federal environmental impact assessment requirements. This book examines alternative methods of modelling the economic, demographic, public service, fiscal and social impacts of major development projects. The authors provide a synthesis of the conceptual bases, estimation techniques, data requirements and types of output available, focusing on models that address multiple impact dimensions and produce information at the county and subcounty levels. They also look at the kind of data each model produces in each impact category.

Environmental Assessment of Socioeconomic Systems D. Burkhardt, 2013-03-09 Neglect of the relation between the socio-economic system and its natural environment has had detrimental consequences in the past. For example, the pollution of the natural environment (water, air and soil) by producing, using and consuming the products of our industrialized economy, the foreseeable exhaustion of natural resources by continuing the increase of industrial production. Most of the recent activities both in research and in administration against these impacts have been technically oriented with the aim of stimulating and introducing new technologies of production and new products to diminish the environmental pollution. But these efforts, which are of course necessary, cannot be successful in approaching the aim which should and must in the long term view be defined as the development of society in balance with the natural environment. Therefore, in addition to an assessment of technologies, emphasis should be put on an assessment of socio-economic systems. On different levels, individual and social preferences determine quantities and qualities of production and consumption, using economical values, e.g. market prices, as regulators. Following this argumentation, an environment assessment of activities against pollution has especially to consider the social response to environmental impacts. Of course, this topic must be a subject of interdisciplinary research. The challenge concerned in this context is to increase the knowledge of the relationship between social-economic and technical subsets.

Econometric Models of Asian-Pacific Countries Shinichi Ichimura, Yasumi Matsumoto, 2012-12-06 This book is a sequel to our first report of ASIAN LINK PROJECT in 1985 *Econometric Models of Asian LINK* Springer Verlag Tokyo Berlin New York. Now the scope is expanded to Asian Pacific Countries in coverage so that this monograph presents the econometric models of Japan, the United States, Canada, China, Korea, Taiwan, Hong Kong, Thailand, the Philippines.

Malaysia Singapore Indonesia Australia and the European Community We are particularly happy to have included the excellent models of Australia and Canada whose economies are essential parts of the Asian Pacific Economic Community Most of those models were presented at the Workshop of Asian Link Project held in Bandung Indonesia at the time of the Second Convention of the East Asian Economic Association 1990 Those models have been updated since then and several other important models were added Unlike our previous book we have not tried here to link these national models as a regional or global model in any way except for the model by S Kinoshita which offers a regional linkage for Pacific basin economies by linking the US Japan Canada the European Community countries as a group Asian NIEs Korea Hong Kong Taiwan ASEAN Indonesia Malaysia the Philippines Singapore and East Asian economies As we argued in our previous publication we tried to publish these econometric models again with the statistical data as much as we could so as to enable the reader examine the estimation and performance of the models by himself

The Future of the World Jenny Andersson, 2018-07-19 The Future of the World is devoted to the intriguing field of study which emerged after World War Two futurism or futurology Jenny Andersson explains how futurist scholars and researchers imagined the Cold War and post Cold War world and the tools and methods they would use to influence and change that world Futurists were a motley crew of Cold War warriors nuclear scientists journalists and peace activists Some argued it should be a closed sphere of science defined by delimited probabilities They were challenged by alternative notions of the future as a potentially open realm Futurism also drew on an eclectic range of repertoires some of which were deduced from positivist social science mathematics and nuclear physics and some of which sprung from alternative forms of knowledge in science fiction journalism or religion These different forms of prediction laid very different claims to how accurately futures could be known and what kind of control could be exerted over what was yet to come The Future of the World carefully examines these different engagements with the future and inscribes them in the intellectual history of the post war period Using unexplored archival collections The Future of the World reconstructs the Cold War networks of futurologists and futurists
