*Sociobiology: Sense or Nonsense?* Michael Ruse, 2013-03-09 In June 1975 the distinguished Harvard entomologist Edward O Wilson published a truly huge book entitled *Sociobiology The New Synthesis* In this book drawing on both fact and theory Wilson tried to present a comprehensive overview of the rapidly growing subject of sociobiology the study of the biological nature and foundations of animal behaviour more precisely animal social behaviour Although as the title rather implies Wilson was more surveying and synthesising than developing new material he compensated by giving the most thorough and inclusive treatment possible beginning in the animal world with the most simple of forms and progressing via insects lower invertebrates mammals and primates right up to and including our own species *Homo sapiens* Initial reaction to the book was very favourable but before the year was out it came under withering attack from a group of radical scientists in the Boston area who styled themselves The Science for the People Sociobiology Study Group Criticism of course is what every academic gets and needs but for two reasons this attack was particularly unpleasant First not only were Wilson's ideas attacked but he himself was smeared by being linked with the most reactionary of political thinkers including the Nazis

Ruse, 1985 In June 1975 the distinguished Harvard entomologist Edward O Wilson published a truly huge book entitled *Sociobiology The New Synthesis* In this book drawing on both fact and theory Wilson tried to present a comprehensive overview of the rapidly growing subject of sociobiology the study of the biological nature and foundations of animal behaviour more precisely animal social behaviour Although as the title rather implies Wilson was more surveying and synthesising than developing new material he compensated by giving the most thorough and inclusive treatment possible beginning in the animal world with the most simple of forms and progressing via insects lower invertebrates mammals and primates right up to and including our own species *Homo sapiens* Initial reaction to the book was very favourable but before the year was out it came under withering attack from a group of radical scientists in the Boston area who styled themselves The Science for the People Sociobiology Study Group Criticism of course is what every academic gets and needs but for two reasons this attack was particularly unpleasant First not only were Wilson's ideas attacked but he himself was smeared by being linked with the most reactionary of political thinkers including the Nazis

**The Sociobiological Imagination** Mary Maxwell, 1991-09-19 This book presents reports on the uses of sociobiology and general evolutionary theory by members of diverse disciplines psychiatry law management theory anthropology economics primatology history political science ethical philosophy cognitive psychology epistemology socioecology of religion studies of conflict Marxist thought aesthetics sociology linguistics and psychology The purpose of the book is threefold to acknowledge the remarkably wide influence of a central idea to demonstrate that the research of human sociobiology takes place in disparate fields and to introduce the major principles of sociobiology There are many surprises to be found in these pages not least the psychiatrist's new look at anxiety the management theorist's explanation for the success of Japanese firms the

Soviet philosopher's report on sociobiology in the U S S R the explanation given for the keeping of harems in ancient kingdoms and the economist's view as to why people care if a bargain price is really a fair price all cast in sociobiological terms     Scientific Challenges to Common Sense Philosophy Rik Peels, Jeroen de Ridder, René van Woudenberg, 2020-05-27

Common sense philosophy holds that widely and deeply held beliefs are justified in the absence of defeaters While this tradition has always had its philosophical detractors who have defended various forms of skepticism or have sought to develop rival epistemological views recent advances in several scientific disciplines claim to have debunked the reliability of the faculties that produce our common sense beliefs At the same time however it seems reasonable that we cannot do without common sense beliefs entirely Arguably science and the scientific method are built on and continue to depend on common sense This collection of essays debates the tenability of common sense in the face of recent challenges from the empirical sciences It explores to what extent scientific considerations rather than philosophical considerations put pressure on common sense philosophy The book is structured in a way that promotes dialogue between philosophers and scientists Noah Lemos one of the most influential contemporary advocates of the common sense tradition begins with an overview of the nature and scope of common sense beliefs and examines philosophical objections to common sense and its relationship to scientific beliefs Then the volume features essays by scientists and philosophers of science who discuss various proposed conflicts between commonsensical and scientific beliefs the reality of space and time about the nature of human beings about free will and identity about rationality about morality and about religious belief Notable philosophers who embrace the common sense tradition respond to these essays to explore the connection between common sense philosophy and contemporary debates in evolutionary biology neuroscience physics and psychology     Explaining Evil W. Paul Franks, 2019-01-10

In Explaining Evil four prominent philosophers two theists and two non theists present their arguments for why evil exists Taking a position and response format in which one philosopher offers an account of evil and three others respond this book guides readers through the advantages and limitations of various philosophical positions on evil making it ideal for classroom use as well as individual study Divided into four chapters Explaining Evil covers Theistic Libertarianism Theistic Compatibilism Atheistic Moral Realism and Atheistic Moral Non realism It features topics including free will theism atheism goodness Calvinism evolutionary ethics and pain and demonstrates some of the dominant models of thinking within contemporary philosophy of religion and ethics Written in accessible prose and with an approachable structure this book provides a clear and useful overview of the central issues of the philosophy of evil     Defending Sin Hans Madueme, 2024-05-28

The conflict between the natural sciences and Christian theology has been going on for centuries Recent advances in the fields of evolutionary biology behavioral genetics and neuroscience have intensified this conflict particularly in relation to origins the fall and sin These debates are crucial to our understanding of human sinfulness and necessarily involve the doctrine of salvation Theistic evolutionists have labored hard to resolve these tensions between

science and faith but Hans Madueme argues that the majority of their proposals do injustice both to biblical teaching and to long standing doctrines held by the mainstream Christian tradition In this major contribution to the field of science and religion Madueme demonstrates that the classical notion of sin reflected in Scripture the creeds and tradition offers the most compelling and theologically coherent account of the human condition He answers pressing challenges from the physical sciences on both methodological and substantive levels Scholars pastors students and interested lay readers will profit from interacting with the arguments presented here Sex, Family, and the Culture Wars Mark J. Cherry, 2017-07-05

Extraordinary social and moral shifts have taken place in Western societies Sex is no longer the exclusive province of husband and wife set within monogamous married family life The world is awash in sex advertising books magazines movies sex clubs internet pornography etc Parents traditionally responsible for guiding their children s moral and social development have been effectively side lined by commercial and governmental interests This volume pursues a detailed study of how changes in social life dating from the sexual revolution of the 1960s have affected the family Cherry shows that attempts to redefine the family away from the marital union of husband and wife come with real costs social emotional psychological and financial He argues that while political campaigns have fuelled attempts to undermine the traditional family to pretend it possesses no basic biological social or moral reality such ideologically driven undertakings are injurious to society Acting as if there are no consequential differences between traditional marriage and other sexual lifestyles ignores significant data demonstrating the importance of the traditional biological family to the well being of men and women and the successful raising of children The family possesses a biological and moral being that is foundational an essential building block of society Cherry argues that the family is the most incontrovertible field of conflict in the culture wars others might conclude that it is the decisive battleground **Altruism and Christian Ethics** Colin Grant, 2000-11-16 Separated from its

anchorage in religion ethics has followed the social sciences in seeing human beings as fundamentally characterised by self interest so that altruism is either naively idealistic or arrogantly self sufficient Colin Grant contends that as a modern secular concept altruism is a parody on the self giving love of Christianity so that its dismissal represents a social levelling that loses the depths that theology makes intelligible and religion makes possible The Christian affirmation is that God is characterised by self giving love agape then expected of Christians Lacking this theological background the focus on self interest in sociobiology and economics and on human realism in the political focus of John Rawls or the feminist sociability of Carol Gilligan finds altruism naive or a dangerous distraction from real possibilities of mutual support This book argues that to dispense with altruism is to dispense with God and with the divine transformation of human possibilities Cognition of the Law Luigi Cominelli, 2018-07-04 This book s basic hypothesis which it proposes to test with a cognitive sociological approach is that legal behavior like every form of human behavior is directed and framed by biosocial constraints that are neither entirely genetic nor exclusively cultural As such from a sociological perspective the law can be seen as a super meme that is

as a biosocial constraint that develops only in complex societies This super meme theory by highlighting a fundamental distinction between defensive and assertive biases might explain the false contradiction between law as a static and historical phenomenon and law as a dynamic and promotional element Socio legal scholars today have to face the challenge of pursuing a truly interdisciplinary approach connecting all the fields that can contribute to building a modern theory of normative behavior and social action Understanding and framing concepts such as rationality emotion or justice can help to overcome the significant divide between micro and macro sociological knowledge Social scientists who are interested in the law must be able to master the epistemological discourses of different disciplines and to produce fruitful syntheses and bridge operations so as to understand the legal phenomenon from each different point of view The book adopts four perspectives sociological psychological biological evolutionary and cognitive All of them have the potential to be mutually integrated and constitute that general social science that provides common ground for exchange The goal is to arrive at a broad and integrated view of the socio legal phenomenon paving the way for a comprehensive theory of norm oriented and norm perceived actions

Postmodern Environmental Ethics Max Oelschlaeger,1995-08-17 This book explains the role of language in causing and in resolving the ecocrisis showing that ecologically adaptive behavior can be facilitated through language The authors explore the discourses of deep ecology ecofeminism Judeo Christianity quantum theory and Native American world views all to the end of empowering ecosocial change

**Dictionary of Concepts in Cultural Anthropology** Robert H. Winthrop,1991-11-18 The field of cultural anthropology describes and interprets the thought and behavior of contemporary and near contemporary societies Inherently pluralistic it offers a framework in which the distinctive perspectives of each cultural world can be appreciated Robert Winthrop s dictionary describes the major concepts that have shaped the discipline both historically and theoretically It sets modern anthropology in its proper context within the broader intellectual tradition Eighty entries review the key concepts culture race nature symbolism adaptation the primitive etc that have established the fundamental problems and issues guided research and served as the focus for debate in key areas of the discipline The entries which range from 2 000 to 6 000 words in length are both thorough in treatment and contemporary in relevance Some entries are primarily of historical significance while others describe recent developments Each entry contains an annotated bibliography and a guide to additional reading on the subject While this is not primarily a technical lexicon many terms have been glossed and explained Designed to be useful to students of

anthropology this dictionary will assist those in other disciplines to find their way through the anthropological labyrinth

**Science, Sexuality, and Race in the United States and Australia, 1780-1940** Gregory D. Smithers,2017 Science Sexuality and Race in the United States and Australia 1780 1940 Revised Edition is a sociohistorical tour de force that examines the entwined formation of racial theory and sexual constructs within settler colonialism in the United States and Australia from the Age of Revolution to the Great Depression Gregory D Smithers historicizes the dissemination and application of scientific and social scientific ideas within the process of nation building in two countries with large Indigenous populations and shows how intellectual constructs of race and sexuality were mobilized to subdue Aboriginal peoples Building on the comparative settler colonial and imperial histories that appeared after the book s original publication this completely revised edition includes two new chapters In this singular contribution to the study of transnational and comparative settler colonialism Smithers expands on recent scholarship to illuminate both the subject of the scientific study of race and sexuality and the national and interrelated histories of the United States and Australia

**Bibliography of Semiotics, 1975-1985** ,1986-01-01 This bibliography of semiotic studies covering the years 1975 1985 impressively reveals the world wide intensification in the field During this decade national semiotic societies have been founded allover the world a great number of international national and local semiotic conferences have taken place the number of periodicals and book series devoted to semiotics has increased as has the number of books and dissertations in the field This bibliography is the result of a dedicated effort to approach complete coverage

**Beyond Developmental** Debal Deb,2009 **Discovering Dune** Dominic J. Nardi,N. Trevor Brierly,2022-08-01 Frank Herbert s Dune is one of the most well known science fiction novels of all time and it is often revered alongside time honored classics like The Lord of the Rings Unlike Tolkien s work the Dune series has received remarkably little academic attention This collection includes fourteen new essays from various academic disciplines including philosophy political science disability studies Islamic theology environmental studies and Byzantine history that examine all six of Herbert s Dune books As a compendium it asserts that a multidisciplinary approach to the texts can lead to fresh discoveries Also included in this collection are an introduction by Tim O Reilly who authored one of the first critical appraisals of Herbert s writings in 1981 and a comprehensive bibliography of essential primary and secondary sources

**A Primer for Environmental Literacy** Frank B. Golley,1998-01-01 This text presents the key concepts of environmental science for those who are not natural scientists It offers a way to improve environmental literacy the capacity to understand the connections between humans and their environment There are reading lists for each topic covered

**The Insect-Populated Mind** David Spooner,2005-08-22 In The Insect Populated Mind author David Spooner proposes a close connection between aspects of insect evolution and the human intellect By examining seemingly disparate subjects such as entomology language theory genetics astronomy literature and music Spooner proves that synthesis is

indeed possible Once this fusion is achieved the human species can be seen as connected not just to the great apes but also via consciousness to metamorphic insects While considering Richard Dawkins and Susan Blackmore s expositions of memes Spooner suggests that the concept of memes remains a peripheral understanding of religion and the arts The book also presents arguments on the roots and nature of the mind in the work of Daniel Dennett and Steven Pinker **Being Humans** Neil Roughley,2013-02-06 No detailed description available for Being Humans
