Social Theory and Language Glyn Williams, 2020-06-07 This volume offers a comprehensive treatment of the historical developments underpinning our present understandings of the relationship between language and the social by integrating the study of language with key strands of sociological theory The book posits that theory conditions how objects are constructed and in turn the meanings allocated to

them and explores the implications for the relationship between language and the social. The volume traces this relationship from its foundations in the work of Enlightenment philosophers in which sociology and linguistics emerged as coherent disciplines. Taking this work as a point of departure, the book examines the unfolding of the interplay between language and the social across developments in sociological theory in subsequent eras encompassing such strands as Marxism, functionalism, interactionism, anti-foundationalism, poststructuralism, critical theory, and critical realism. A final chapter turns its eye toward contemporary sociolinguistics and its treatment of different sociological perspectives and future directions for its continued development. Reflecting on trajectories in sociological theory toward informing our understanding of the relationship between language and the social today, this book will be key reading for students and scholars in sociolinguistics, philosophy of language, and those working in sociology and geography with an interest in language issues.

Sociolinguistic Analysis of the New Testament Hughson T. Ong, 2021-09-06. This book introduces sociolinguistic criticism to New Testament studies. The individual essays cover a wide range of sociolinguistic theories: multilingualism, speech communities, and individuals' language and social domains, diglossia, digraphia, codeswitching, language maintenance and shift, communication accommodation theory, social identity theory, linguistic politeness theory, discourse analysis, conversation analysis, register analysis, interactional sociolinguistics, ethnography of communication, etc. that treat topics and issues pertaining to the language and sociolinguistic contexts of the New Testament: social memory, orality and literacy, and the oral traditions of the Gospels and various texts and genres in the New Testament.

Globalising Sociolinguistics Dick Smakman, Patrick Heinrich, 2015-05-15. This book challenges the predominance of mainstream sociolinguistic theories by focusing on lesser-known sociolinguistic systems from regions of Africa, Asia, the Caribbean, South America, the European Mediterranean, and Slavic regions, as well as specific speech communities such as those speaking Nivkh, Jamaican Creole, North Saami, and Central Yup'ik. In nineteen chapters, the specialist authors look at key sociolinguistic aspects of each region or speech community such as gender, politeness strategies, speech patterns, and the effects of social hierarchy on language, concentrating on the differences from mainstream models. The volume, introduced by Miriam Meyerhoff, has been written by the leading expert of each specific region or community and includes contributions by Rajend Mesthrie, Marc Greenberg, and Daming Xu. This publication draws together connections across regions, communities, and considers how mainstream sociolinguistics is incomplete or lacking. It reveals how lesser-known cultures can play an important role in the building of theory in sociolinguistics. *Globalising Sociolinguistics* is essential reading for any researcher in sociolinguistics and language variation and will be a key reference for advanced sociolinguistics courses.
