Sociological Methodology 1975 David R. Heise, 1977 **Sociological Methodology, 1975** David R. Heise, 1974
Toward the integration of content analysis and general methodology Cluster analysis Scaling replicated conditional rank order data Method for classifying interval scale and ordinal scale data Multiple indicators and the relationship between abstract variables **On Durkheim's Rules of Sociological Method (Routledge Revivals)** Mike Gane, 2010-11 This radical appraisal of Durkheim's method first published in 1988 argues that fundamental errors have been made in interpreting Durkheim Mike Gane argues that to understand The Rules it is necessary also to understand the context of the French society in which the book was written He explores the cultural and philosophical debates which raged in France during the period when Durkheim prepared the book and establishes the real and unsuspected complexity of Durkheim's position its formal complexity its epistemological complexity and its historical complexity *Methods of Social Research, 4th Edition* Kenneth Bailey, 2008-06-30 An introduction for undergraduates to every stage of sociological research showing how to deal effectively with typical problems they might encounter The book is fully updated to include examples from the LA riots and the 1992 presidential elections *Methods of Social Research* Kenneth D. Bailey, 1994 An introduction for undergraduates to every stage of sociological research showing how to deal effectively with typical problems they might encounter The book is fully updated to include examples from the LA riots and the 1992 presidential elections **Toward a Structural Theory of Action** Peter H. Rossi, 2013-10-22 Toward a Structural Theory of Action Network Models of Social Structure Perception and Action centers on the concept of social structure perceptions and actions as well as the strategies through which these concepts guide empirical research This book also proposes a model of status role sets as patterns of relationships defining positions in the social topology This text consists of nine chapters separated into three parts Chapter 1 introduces the goals and organization of the book Chapters 2-4 provide analytical synopsis of available network models of social differentiation and then use these models in describing actual stratification Chapter 5 presents a model in which actor interests are captured Subsequent chapter assesses the empirical adequacy of the two predictions described in this book Then other chapters provide a network model of constraint and its empirical adequacy This book will be valuable to anthropologists economists political scientists and psychologists **Measurement in the Social Sciences** Richard A. Zeller, Edward G. Carmines, 1980-04-30 This textbook is designed to bridge the gap between the theorist and the methodologist by presenting an integrated approach to measurement By differentiating between random and systematic error it conveys both statistical techniques and their theoretical underpinnings essential to students of sociology and political science Rather than developing new technical methods of new theoretical structures Professors Zeller and Carmines provide thorough explanations of the assumptions limitations and interpretations of previously established techniques and theories Written at a level accessible to students of social science with some statistical training the book does not presume a

sophisticated mathematical background By concentrating on synthesizing the methodological and theoretical realms Zeller and Carmines demonstrate why measurement considerations are important to research and how measurement principles can be most effectively applied *Sociological Methods & Research*, 1987

Social Dynamics Models and Methods Nancy Brandon Tuma, 1984-08-28 Social Dynamics Models and Methods focuses on sociological methodology and on the practice of sociological research This book is organized into three parts encompassing 16 chapters that deal with the basic principles of social dynamics The first part of this book considers the development of models and methods for causal analysis of the actual time paths of change in attributes of individual and social systems This part also discusses the applications in which the use of dynamic models and methods seems to have enhanced the capacity to formulate and test sociological arguments These models and methods are useful for answering questions about the detailed structure of social change processes The second part explores the formulation of the continuous time models of change in both quantitative and qualitative outcomes and the development of suitable methods for estimating these models from the kinds of data commonly available to sociologists The third part describes a stochastic framework for analyzing both qualitative and quantitative outcome of social changes This part also discusses the sociologists perspective on the empirical study of social change processes This text will be of great value to sociologists and sociological researchers

Research in Social Stratification and Mobility Kevin T Leicht, 2003-12-03 Volume 20 of Research in Social Stratification and Mobility continues to remain at the forefront of the diverse group of social scientists who study social inequality and is now the official publication of the Social Stratification Research Group of the International Sociological Association RC 28 This issue features a comprehensive retrospective on the 40 years of contributions to social stratification research made by the late William Sewell and the Wisconsin Longitudinal Survey including an all inclusive bibliography of publications Other contributions address the growing differences between workers with full time jobs and various categories of the underemployed in Israel the United States and Germany social mobility in Korea and Sweden subjective responses to social inequality and the social consequences of status inconsistency and analyses of class consciousness and growing wealth inequality in the OECD

Research Methods in Social Network Analysis Linton C. Freeman, Douglas R. White, Antone Kimball Romney, Since the publication of Herbert Spencer's Principles of Sociology in 1875 the use of social structure as a defining concept has produced a large body of creative speculations insights and intuitions about social life However writers in this tradition do not always provide the sorts of formal definitions and propositions that are the building blocks of modern social research In its broad ranging examination of the kind of data that form the basis for the systematic study of social structure Research Methods in Social Network Analysis marks a significant methodological advance in network studies As used in this volume social structure refers to a bundle of intuitive natural language ideas and concepts about patterning in social relationships among people In contrast social networks is used to refer to a collection of precise analytic and methodological concepts and procedures that facilitate the collection of

data and the systematic study of such patterning Accordingly the book's five sections are arranged to address analytical problems in a series of logically ordered stages or processes The major contributors define the fundamental modes by which social structural phenomena are to be represented how boundaries to a social structure are set how the relations of a network are measured in terms of structure and content the ways in which the relational structure of a network affects system actors and how actors within a social network are clustered into cliques or groups The chapters in the last section build on solutions to problems proposed in the previous sections This highly unified approach to research design combined with a representative diversity of viewpoints makes *Research Methods in Social Network Analysis* a state of the art volume

Communication Yearbook 5 Michael Burgoon, 1981-12-01 Published under the auspices of the International Communication Association this volume the fifth in the Communication Yearbook series provides an annual overview and synthesis of developments in the science of communication Disciplinary reviews and commentaries on general topics in all subdivisions of communication accompany analyses of developments in communication theory and research in specialized areas within the communication sciences Among the areas covered are information systems interpersonal communication political communication instructional communication health communication mass communication organizational communication and intercultural communication Reviews and commentaries are commissioned by the editor and divisional overviews are prepared by scholars in each area of specialization Articles presenting current research are selected through competitive judging processes within each interest area

Social Networks Samuel Leinhardt, 2013-09-17 *Social Networks: A Developing Paradigm* contains studies of the nature and impact of social structure on behavior It draws together readings from a variety of social science areas that share the basic premise that structure in social relationships can be fruitfully operationalized in terms of networks It attempts to bring together classic works that opened new research areas and works that contain important statements of perspective method or empirical findings The book is organized into four parts Part I focuses on the cognitive organization of social relations and the effects of local social structure on individuals In Part II the authors consider networks of ties in large social agglomerations and treat a variety of different types of social relationships The emphasis here is on empirical studies Specific extant social networks are investigated to test a variety of structural hypotheses Part III contains studies that address issues more common among social anthropologists than sociologists or social psychologists The chapters in Part IV while occasionally containing applications are primarily methodological These discuss mathematical and statistical ideas for modeling and analyzing social networks

Ethnic Segregation in Cities Ceri Peach, Vaughan Robinson, Susan Smith, 2023-07-31 First published in 1981 *Ethnic Segregation in Cities* argues that race and ethnicity are fundamental to writing about the city and that economic patterns adapt themselves to race and ethnicity rather than vice versa The problem of ethnic segregation is a burning one for both geographers and sociologists geographers because of the concern for all aspects of urban deprivation and sociologists because they are discovering that space and

spatial processes are important factors in influencing social segregation or assimilation The book brings together some of the main contributors to the literature on spatial aspects of ethnicity from both sides of the Atlantic A variety of evidence from New York Detroit Bradford and Blackburn address the question of whether choice on the path of ethnic members or constraints imposed by the host society are determinant factors influencing residential segregation This book will be of interest to students of sociology human geography and urban studies **The Unbounded Community** Kenneth A.

Scherzer,2014-12-01 Stick ball stoop sitting pickle barrel colloquys The neighborhood occupies a warm place in our cultural memory a place that Kenneth A Scherzer contends may have more to do with ideology and nostalgia than with historical accuracy In this remarkably detailed analysis of neighborhood life in New York City between 1830 and 1875 Scherzer gives the neighborhood its due as a complex richly textured social phenomenon and helps to clarify its role in the evolution of cities After a critical examination of recent historical renderings of neighborhood life Scherzer focuses on the ecological symbolic and social aspects of nineteenth century community life in New York City Employing a wide array of sources from census reports and church records to police blotters and brothel guides he documents the complex composition of neighborhoods that defy simple categorization by class or ethnicity From his account the New York City neighborhood emerges as a community in flux born out of the chaos of May Day the traditional moving day The fluid geography and heterogeneity of these neighborhoods kept most city residents from developing strong local attachments Scherzer shows how such weak spatial consciousness along with the fast pace of residential change diminished the community function of the neighborhood New Yorkers he suggests relied instead upon the unbounded community a collection of friends and social relations that extended throughout the city With pointed argument and weighty evidence The Unbounded Community replaces the neighborhood of nostalgia with a broader multifaceted conception of community life Depicting the neighborhood in its full scope and diversity the book will enhance future forays into urban history Measurement of Subjective Phenomena ,1981
