social theory qualitative methods social psychology and narrative inquiry this volume will change the way the general public looks at interpretive sociology This book is organized as an expression of the centrality of interactionism to general sociology Each chapter is designed to articulate this view of the field Symbolic interactionism the way Maines has come to understand and use it is essentially the concerted application of pragmatist principles of philosophy to social inquiry There are four basic elements to this characterization First people transform themselves people are self aware beings who reflexively form their conduct and thus are capable of adjusting their lines of action and creating new ones Second people transform their social worlds human action takes place in contexts of situations and social worlds People can modify the social matrices in which they act and thus people are agents of change Third people engage in social dialogue communication is generic and is at the heart of both stability and change A fourth element is that people respond to and deal with their transformations Humans construct situations and societies they establish social structures and cultures These are the consequences of human action and once formed they reflexively function to direct and channel conduct Maines argues that when people do things together they can create enduring group formations such as divisions of labor rules for inheritance wage labor relations or ideologies These are instances of group characteristics that influence human conduct and indeed are not reducible to the traits of individuals making up the group or society

The Routledge International Handbook of Interactionism Dirk vom Lehn, Natalia Ruiz-Junco, Will Gibson, 2021-05-26 The Routledge International Handbook of Interactionism demonstrates the promise and diversity of the interactionist perspective in social science today providing students and practitioners with an overview of the impressive developments in interactionist theory methods and research Thematically organized it explores the history of interactionism and the contemporary state of the field considering the ways in which scholars approach topics that are central to interactionism As such it presents discussions of self identity gender and sexuality race emotions social organization media and the internet and social problems With attention to new developments in methods and methodologies including digital ethnography visual methods and research ethics the authors also engage with new areas of investigation that have emerged in light of current societal developments such as policing and police violence interactionism beyond binaries and social media Providing a comprehensive overview of the current state and possible future of interactionist research it will appeal to interactionist scholars as well as to established sociologists and students of sociology who have an interest in latest developments in interactionism

Interactionism Paul Atkinson, William Housley, 2003-03-27 Atkinson and Housley have produced a book that is a very competent interesting and useful addition to other work in the field Its distinctive contribution for me lies in the exploration of the relationship between and developments within interactionist sociologies Sociology What is symbolic interactionism This refreshing and authoritative book provides readers with A guide to the essential thinking research and concepts in interactionism A demonstration of the use of the interactionist approach An explanation of why the interactionist influence has not been fully acknowledged in Britain The authors argue that few

sociologists in Britain have identified themselves with symbolic interactionism even though many have engaged with interactionist ideas in their research and methodological work We are all interactionists now in the sense that many of the key ideas of interactionism have become part of the mainstream of sociological thought Currently fashionable approaches to sociology display a kind of collective amnesia A good deal of today's ideas that are presented as novel or innovative only appear so because earlier contributions interactionism among them are not explicitly acknowledged

Essays in Interactionist Sociology Harvey A. Farberman, 2019-03-15 Essays in Interactionist Sociology contains a selection of contributions spanning five decades that advance the theory organization and research of the interactionist tradition Harvey A Farberman professor emeritus of social welfare policy at Stony Brook University wrote the fourteen essays twelve of which were published in academic journals or annuals and two that are original to this volume Each one focuses on some aspect of the theory of symbolic interactionist sociology the professional and organizational development of the interactionist perspective or empirical studies inspired by the perspective The author highlights the emergence of the perspective from the philosophy of American Pragmatism paying particular attention to the contributions of Charles Sanders Peirce and William James He also examines what may be called refractions of the perspective The latter part of the book contains four studies Personalization in Lower Class Consumer Interactions A Criminogenic Market Structure The Automobile Industry Fantasy in Everyday Life The Intersection of Social Psychology and Political Economy and Family Caregiving to Elders in New York State In many ways the essays in this volume contribute to and reflect the development of interactionist sociology as it grew from an American innovation to a robust international social science discipline

Reading the World Rafael F Narváez, 2024-07-26 Reading the World An Introduction to Sociological Critique and Analysis helps students see that the normal familiar aspects of their everyday life frequently have unexpected and even startling dimensions Students learn to uncover layers of meaning that are hard to spontaneously perceive in things behaviors and events in the world around them The book helps readers understand how and why the familiar can be deceptive It shows that the sciences sociology included help us see things otherwise blurred by our own habits of thought obscured by unexamined mental routines that limit what we can perceive think and imagine The book thus helps students open a window into the world and into their own mental routines It invites them to explore the life of the curious and of the free the proper life for a citizen of a republic The text also helps students understand how individuals and societies develop a sense of curiosity about the way the world works and a related readiness for the new the unexpected and the strange It shows that this kind of reflective attitude has changed history liberated us from our own unexamined perceptions and bettered the human experience All chapters have been updated and expanded a new discussion about the nature and role of new media has been added Whereas the 2nd edition featured 13 chapters the 3rd edition features 15 Reading the World is designed for undergraduate courses in the social sciences including sociology social psychology and social theory It draws from sources in six languages other than English

which are mostly unavailable in English translation Society in the Digital Age William Housley, 2021 In *Society in the Digital Age* An Interactionist Perspective William Housley explores the ways interactionist thinking contributes to our understanding of current trends and topics within digital sociology **The Faultline of Consciousness** David R. Maines, 2001 In this compendium of related and cross referential essays David R Maines draws from pragmatist symbolic interactionist assumptions to formulate a consistent new view of the entire field of sociology Suitable for courses in social theory qualitative methods social psychology and narrative inquiry this volume will change the way the general public looks at interpretive sociology This book is organized as an expression of the centrality of interactionism to general sociology Each chapter is designed to articulate this view of the field Symbolic interactionism the way Maines has come to understand and use it is essentially the concerted application of pragmatist principles of philosophy to social inquiry There are four basic elements to this characterization First people transform themselves people are self aware beings who reflexively form their conduct and thus are capable of adjusting their lines of action and creating new ones Second people transform their social worlds human action takes place in contexts of situations and social worlds People can modify the social matrices in which they act and thus people are agents of change Third people engage in social dialogue communication is generic and is at the heart of both stability and change A fourth element is that people respond to and deal with their transformations Humans construct situations and societies they establish social structures and cultures These are the consequences of human action and once formed they reflexively function to direct and channel conduct Maines argues that when people do things together they can create enduring group formations such as divisions of labor rules for inheritance wage labor relations or ideologies These are instances of group characteristics that influence human conduct and indeed are not reducible to the traits of individuals making up the group or society David R Maines is professor and chair of sociology and anthropology at Oakland University Rochester Michigan where he teaches courses on urban sociology and social stratification He was one of the founding members of the Society for the Study of Symbolic Interaction and in 1999 received the SSSI George Herbert Mead Award for lifetime contributions to scholarship **Meanings and Situations (RLE Social Theory)** Arthur Brittan, 2020-08-26 *Meanings and Situations* is an account of the interactionist position It is a committed account in the sense that it sees the central concerns of social psychology and sociology as being located in an interpretative and humanistic framework At the same time it argues for a bio social image of man which does not do violence to the way in which men in interaction continuously construct and renegotiate meaning This is in contrast to some of the highly fashionable exchange and game models of interaction which dominate the thinking of proponents of respectable behavioural science Hence so the author urges the current upsurge of interest in social phenomenology ethnomethodology and symbolic interactionism is more than a reaction to the reigning paradigm in behavioural science Arthur Brittan believes this new interest is essentially a return to the humanistic sources of these disciplines which have been in constant danger of being overwhelmed by the

behavioural ideology **People, Technology, and Social Organization** Dirk vom Lehn, Will Gibson, Natalia Ruiz-Junco, 2023-10-19 This insightful and accessible book is a response to the increasingly important role that technology plays in everyday life and the urgent need for empirical studies that analyse the impact of technology on social practices. The chapters in this co-edited collection reveal how technology is oriented to and embedded within the social organization of action in a wide range of settings and institutions including education, markets, arts and culture, health and social care, media, politics and science. In their analyses, the contributing authors adopt interactionist perspectives to explore how the meanings of technology emerge and are negotiated within and through action and interaction. The volume comprises 14 empirical chapters from authors working in fields such as symbolic interactionism, ethnomethodology, conversation analysis, discourse methods, ethnographic enquiry, video-based methods and others. The chapters are framed by an introduction and a concluding discussion by the co-editors which draws out the key themes and issues that the individual chapters speak to and show the importance of these themes for the social sciences and for society. The book is primarily aimed at researchers in the social sciences including sociology, social psychology, organization studies and beyond whose work is concerned with the interplay between social interaction, technology and institutions.
