Sociology is the scientific study of human society, social relationships, and the patterns of behavior that emerge within them.

KEY THEORIES

- **Functionalism:** The study of how societies achieve stability and order through social institutions.
- **Critical Theory:** The study of how social institutions maintain social inequalities and power imbalances.
- **Symbolic Interactionism:** The study of how society is constructed through shared meanings, symbols, and interactions among individuals.

Conversation Analysis and Sociological Theory Melisa Stevanovic, David Inglis, Anssi Peräkylä, Emmi Koskinen, 2024-08-22 The relations between Conversation Analysis CA sociology and social theory are complex often ambiguous and have sometimes been rather fraught While there might be some relatively high level of agreement amongst their practitioners on what CA is what it does and what it is meant to achieve that is not so much the case for the more open and broad terrains of sociology and social theory Moreover each of the domains in question has changed in orientation composition and academic location since CA first came into existence in the late 1960s While initially a child of sociology as CA has matured and extended its substantive and methodological reach it has become a large intellectual domain in its own right with inputs from and relevance for a host of other disciplines notably linguistics anthropology and psychology It is now no longer at all clear how CA relates to sociology and social theory what each side currently does or what it could bring to the other in the future

Philosophical Foundations of the Three Sociologies (RLE Social Theory) Ted Benton, 2014-09-19 An extended historical and philosophical argument this book will be a valuable text for all students of the philosophy of the social sciences It discusses the serious alternatives to positivist and empiricist accounts of the physical sciences and poses the debate between naturalism and anti naturalism in the social sciences in new terms Recent materialist and realist philosophies of science make possible a defence of naturalism which does not make concessions to positivism and which recognizes the force of several of the anti positivist arguments from the main anti naturalist neo Kantian tradition The author presents a critical evaluation of empiricist and positivist theories of knowledge and investigates some classic attempts at using them to provide the philosophical foundation for a scientific sociology He takes the Kantian critique of empiricism as the starting point for the main anti positivist and anti naturalist philosophical approaches to the social studies He goes on to investigate the inadequacy of post Kantian arguments from Rickert Weber Winch and others both against non positivist forms of naturalism and as the possible source of a distinctive philosophical foundation for the social studies The book concludes with a critical investigation of the Marxian tradition and an attempt to establish the possibility of a materialist and realist defence of the project of a natural science of history which escapes the fundamental flaws of both positivist and neo Kantian attempts at philosophical foundation
