

## Sociology 2<sup>nd</sup> CT

**1. Definition of Culture:** Culture is defined as the complex whole encompassing knowledge, belief, art, morals, law, customs, and other capabilities acquired by humans as members of society. Robert Bierstedt describes culture as everything we think, do, and have as members of society, while Edward B. Tylor defines it as a complex whole inclusive of all habits and practices learned in society.

### 2. Types of culture:

Culture is broadly divided into two main categories:

**Material Culture:** This aspect of culture consists of physical objects and technology created by people, such as buildings, transportation systems, clothing, and other tangible items that shape daily life. Material culture is often seen as the visible part of civilization because it reflects the technological and structural achievements of a society. Examples include items like tools, machines, and infrastructures, which have become foundational to modern societies.

**Non-Material Culture:** Unlike material culture, non-material culture is more abstract and includes elements like beliefs, languages, customs, and values. These intangible components help shape the way people perceive and respond to the world. Non-material culture is also referred to as "inner culture" because it influences how individuals think, feel, and interact. Examples include religious beliefs, moral values, language, and traditions that dictate acceptable behavior and attitudes within a society.

### 3. Elements of Culture:

Culture comprises several fundamental elements that contribute to the fabric of social life:

- **Cognitive Elements:** This refers to the collective knowledge a society holds about the world, covering everything from scientific understanding to everyday practices. This knowledge helps individuals make sense of their environment and adapt to it effectively.
- **Beliefs:** Beliefs are accepted ideas and convictions that people hold true within their cultural context. They shape how individuals understand the world around them and guide behaviors, often fulfilling spiritual or psychological needs. For instance, certain cultural or religious groups may hold specific beliefs about nature, health, or social roles.
- **Values and Norms:** Values signify principles that a society deems essential, like fairness or bravery, influencing what is considered desirable or good. Norms, on the other hand, are the socially accepted behaviors or "rules" derived from these values, governing how individuals interact. Together, values and norms create a framework for acceptable conduct in society.
- **Symbols:** Symbols are visual or verbal representations that convey deeper meanings within a culture. They can be as simple as a gesture, like a handshake, or as complex as
