The third section covers surgical specialities: paediatrics, endocrinology, urology, and also includes specialities such as ophthalmology, ENT, and orthopaedics. These are often omitted from competing books to save space. The logical arrangement of the three sections makes the book easy to use and refer to in clinical practice. The arrangement of contents is straightforward and easily understood. Text boxes are used throughout to highlight and isolate important information. Includes over 350 four colour images and line drawings original to this book and greatly praised by students. Also includes over 100 black and white and approximately 50 full colour clinical photographs, X-rays, and scans. Designed to complement Kumar and Clark's highly successful Clinical Medicine textbook so that students can have matching texts in these complementary areas. Written by an expert team of contributors.
