affections Does this maxim presume that we can or should only love others biologically similar to ourselves Are we nobler if we do or somehow defective if we don't Thicker than Water examines the roots of this belief by studying the omnipresent discourse of bloodlines and kindred relations in the literature of early modern Europe specifically its role in the creation and maintenance of oppressive social structures Lauren Weindling examines how drama from England France and Italy tests these assumptions about blood and love exposing their underlying political function Among the key texts that Weindling studies are Shakespeare's Romeo and Juliet Othello and The Merchant of Venice Pierre Corneille's Le Cid Giambattista della Porta's La Sorella and its English analog Thomas Middleton's No Wit Help Like a Woman's John Ford's 'Tis Pity She's a Whore and Machiavelli's La Mandragola Each of these plays in some way offers an extreme limit case for these beliefs in plots of love courtship and marriage e.g. blood feuds or incest They also illustrate that blood functions not as a biological basis for affinities but discursively Moreover they feature the voices of marginalized groups unprivileged by this ideology which present significant counterpoints to this bloody worldview Those outsiders reveal that finding alternative vocabularies to the bloody discourse of elite groups is both extremely difficult and often ineffectual further evidenced by their persistence today Much critical work on blood has examined this discourse as it manifests onstage as evidence of guilt the product of violence or in bleeding figures This book instead examines the work that blood does unseen in its connection to discourses of love and kinship arbitrating social and emotional connections between persons and thus underwriting our deepest forms of social organization
