The Concept of Self in Education, Family, and Sports Anne P. Prescott,2006 The issue of self concept is central to the studies and practices of education and psychology The varying degrees of self esteem that exist between individuals can offer insight into the varying degrees of health and efficiency that exist for individuals in the worlds of education family and sport The research presented in this book are the latest explorations of how self concept translates into and has an effect on these far reaching and unavoidable aspects of life **Interpreting the Self** Diane Bjorklund,2000-04-15 In this ambitious

study Diane Bjorklund explores the historical nature of self narrative Examining over 100 American autobiographers published in the last two centuries she discusses not only well known autobiographies such as Mark Twain and Andrew Carnegie but also many obscure ones such as a traveling book peddler a minstrel a hotel proprietress an itinerant preacher a West Point cadet and a hoopskirt wire manufacturer Bjorklund draws on the colorful stories of these autobiographers to show how their historical epoch shapes their understandings of self A refreshingly welcome approach to this intriguing topic Bjorklund s extensive and systematic approach to her source material is impressive and enriches our understanding of this essential subject Virginia Quarterly Review Bjorklund studies both famous and obscure writers and her clear prose style and copious quotations provide insight into the many aspects of the changing American self Library Journal Human

Motivation and Interpersonal Relationships Netta Weinstein,2014-07-08 This volume summarizes and organizes a growing body of research supporting the role of motivation in adaptive and rewarding interpersonal interactions with others The field of human motivation is rapidly growing but most studies have focused on the effects of motivation on individuals personal happiness and task engagement Only recently have theorists and empiricists begun to recognize that dispositional and state motivations impact the ways individuals approach interpersonal interactions In addition researchers are now recognizing that the quality of interpersonal interactions influences consequent happiness and task engagement thus helping to explain previous findings to this end Similarly social psychology and relationships researchers have focused on the impact of cognitions emotions and behaviors on people s relationships In their work relationships researchers demonstrate that both contextual characteristics and individual differences influence the quality of interactions Many of these studies seek to

understand which characteristics strengthen the bonds between people encourage empathy and trust and create a sense of well being after a close interaction This work seeks to integrate the field of human motivation and interpersonal relationships Both fields have seen extensive growth in the past decade and each can contribute to the other However no single compiled work is available that targets both fields This is the case in part because only now is there enough work to make a strong and compelling case for their integration In the previous years research has been conducted to show that motivation is relevant and important for interactions among strangers and in close relationships In addition developmental mechanisms for these relations are identified and mechanisms by which motivation strengthens people s relationships Finally recent work has demonstrated the many implications for interpersonal relationships showing that motivation impacts a range of interpersonal processes from prejudice regulation and objectification of others to empathy and care This book seeks to summarize and organize all these findings and present them in a way that is relevant to both motivation researchers and social and relationship researchers The Oxford Handbook of Work Engagement, Motivation, and Self-Determination Theory

Marylene Gagne PhD, 2014-06-09 Self determination theory is a theory of human motivation that is being increasingly used by organizations to make strategic HR decisions and train managers It argues for a focus on the quality of workers motivation over quantity Motivation that is based on meaning and interest is showed to be superior to motivation that is based on pressure and rewards Work environments that make workers feel competent autonomous and related to others foster the right type of motivation goals and work values The Oxford Handbook of Work Motivation Engagement and Self Determination Theory aims to give current and future organizational researchers ideas for future research using self determination theory as a framework and to give practitioners ideas on how to adjust their programs and practices using self determination theory principles The book brings together self determination theory experts and organizational psychology experts to talk about past and future applications of the theory to the field of organizational psychology The book covers a wide range of topics including how to bring about commitment engagement and passion in the workplace how to manage stress health emotions and violence at work how to encourage safe and sustainable behavior in organizations how factors like attachment styles self esteem person environment fit job design leadership compensation and training affect work motivation and how work related values and goals are forged by the work environment and affect work outcomes The Self Explained

Kohut, Loewald and the Postmoderns Judith G. Teicholz, 2015-12-22 In *Kohut Loewald and the Postmoderns* Judith Teicholz using the contemporary critique of Kohut and Loewald as a touchstone of inquiry into the current status of psychoanalysis focuses on a select group of postmodern theorists whose recent writings comprise a questioning subtext to Kohut's and Loewald's ideas. Acutely aware of the important differences among these theorists, Teicholz nonetheless believes that their respective contributions which present psychoanalysis as an interactive process in which the analyst's own subjectivity plays a constitutive role in the joint construction of meanings achieve shared significance as a postmodern critique of Kohut and Loewald. She is especially concerned with the relationship both theoretically and technically between Kohut's emphasis on the analyst's empathic resonance with the analysand's viewpoint and affect and the postmodern theorists' shared insistence on the expression of the analyst's own subjectivity in the treatment situation. Her analysis incorporates fine insight into the tensions and ambiguities in Kohut and Loewald whose work ultimately emerges as a way station between modern and postmodern viewpoints and her appreciation of Kohut and Loewald as transitional theorists makes for an admirably even handed exposition. She emphasizes throughout the various ways in which Kohut and Loewald gave nascent expression to postmodern attitudes but she is no less appreciative of the originality of postmodern theorists who address genuine lacunae in the thought and writings of these exemplars of an earlier generation. Teicholz's examination of what she terms two overlapping partial revolutions in psychoanalysis that of Kohut and Loewald on one hand and of the postmoderns on the other throws an illuminating searchlight on the path psychoanalysis has traveled over the last quarter of the 20th century.

Textbook of Developmental Pediatrics Marvin I. Gottlieb, Janice E. Williams, 2013-11-11 Child adolescent development and behavior have been a traditional concern of primary health care providers. However it was not until the mid 1960s that attempts were made to consolidate developmental behavioral issues into an identifiably distinct fund of medical knowledge. During the ensuing two decades developmental behavioral pediatrics was recognized as a clinical and research subspecialty within the framework of comprehensive health care for children. The influence of public advocacy groups, topic dedicated journals, national professional specialty societies, subject related continuing education programs and federal legislation PL94-142 has served to crystallize developmental behavioral pediatrics as a specialized field of study. As a consequence during the past ten years significant modifications have restructured medical student and pediatric resident education providing an emphasis on developmental behavioral issues. The focus on neurodevelopmental, educational and psychosocial issues reflects changing priorities in traditional health care for children. The postgraduate training of pediatric fellows in two and three year training programs was initiated to accommodate professional manpower needs in both academic and practice settings. Many of the problems in childhood development and behavior frequently span the traditional areas of child neurology, child psychiatry and general pediatrics. As a result there has been some confusion in demarcating

professional responsibilities in diagnosis and management as well as poorly defined terminology and classification schemas. With the birth of developmental pediatrics as a pediatric specialty a more cohesive fund of knowledge has been accumulated and more meaningful strategies have been designed for prevention, diagnosis and management.

The Moral Self Pauline Chazan, 2002-11-01. The Moral Self addresses the question of how morality enters into our lives. Pauline Chazan draws upon psychology, moral philosophy and literary interpretation to rebut the view that morality's role is to limit desire and control self-love. Perserving the ancients' connection between what is good for the self and what is morally good, Chazan argues that a certain kind of care for the self is central to moral agency. Her intriguing argument begins with a critical examination of the views of Hume, Rousseau and Hegel. The constructive part of the book takes a more unusual turn by synthesising the work of the analyst Heinz Kohut and Aristotle into Chazan's own positive account, which is then illustrated by the use of Russian literature.

The Self in Social Psychology Roy F. Baumeister, 1999. This reader presents a collection of articles on the study of the self in social psychology. The readings are in thematic sections covering topics such as self-knowledge, self-esteem, self-regulation, self-presentation and the self and culture.

Self-Determination Theory Richard Ryan, Edward L. Deci, 2018-11-06. Among the most influential models in contemporary behavioral science, self-determination theory (SDT) offers a broad framework for understanding the factors that promote human motivation and psychological flourishing. In this authoritative work, SDT cofounders Richard M. Ryan and Edward L. Deci systematically review the theory's conceptual underpinnings, empirical evidence base and practical applications across the lifespan. Ryan and Deci demonstrate that supporting people's basic needs for competence, relatedness and autonomy is critically important for virtually all aspects of individual and societal functioning.

Making Sense of Beliefs and Values Craig N. Shealy, 2015-12-18. Social psychologists have studied beliefs and values and related constructs such as attitudes and prejudice for decades. But as this innovative and interdisciplinary book convincingly demonstrates, the scientific examination of beliefs and values now influences research and practice across a range of disciplines. Specifically, this edited volume explores the many cutting-edge implications and applications of Equi-Integration or EI Theory and the Beliefs, Events and Values Inventory (BEVI). Grounded in twenty years of research and practice, EI Theory seeks to explain the processes by which beliefs, values and worldviews are acquired and maintained, why their alteration is resisted, and under what circumstances they are modified. Based upon EI Theory, the BEVI is a comprehensive analytic tool which examines how and why we come to see ourselves, others and the larger world as we do, as well as the influence of such processes on multiple aspects of human functioning. Edited by the developer of the EI model and BEVI method and informed by contributions from leading U.S. and international scholars, this book features captivating research findings and pioneering practice applications. Research-focused chapters explain how the EI model and BEVI method increase our conceptual sophistication and methodological capacity across a range of areas: Culture, Development, Environment, Gender, Personality,

Politics and Religion Practice oriented chapters demonstrate how the BEVI is used in the real world across a range of applied domains Assessment Education Forensics Leadership and Psychotherapy Written in an accessible and engaging manner this fascinating and timely volume speaks to many of the most pressing issues of our day by illuminating why we believe what we believe and demonstrating how our beliefs and values may be assessed explained and transformed in the real world Key Features Presents an interdisciplinary theoretical model and innovative assessment method derived from two decades of work on the etiology maintenance and transformation of beliefs and values Features contributions from leading scholars from the U S and internationally demonstrating the many implications and applications of this cutting edge approach for research and practice Demonstrates the importance of making sense of beliefs and values in addressing many of the most pressing issues of our day

The 3M Model of Motivation and Personality John C. Mowen, 2013-03-14 Integrating control theory evolutionary psychology and a hierarchical approach to personality this book presents a new approach to motivation personality and consumer behavior Called the 3M which stands for Meta theoretic Model of Motivation this theory seeks to account for how personality traits interact with the situation to influence consumer attitudes and actions The book proposes that multiple personality traits combine to form a motivational network that acts to influence behavior Mowen argues that in order to understand the causes of enduring behavioral tendencies one must identify the more abstract traits underlying surface behaviors In constructing the 3M model the author reports data from fifteen empirical studies employing over 3500 respondents In this hierarchical model four types of personality traits are identified elemental compound situational and surface traits Eight elemental traits are proposed as forming the underlying dimensions of personality Consistent with control theory the research reveals that the elemental traits combine to form compound traits such as self efficacy task orientation playfulness and competitiveness These elemental and compound traits combine with situational influences to cause enduring behavioral tendencies within general situational contexts Examples of situational traits investigated include impulsive buying value consciousness sports interest and health motivation In the 3M model the elemental compound and situational traits combine to yield surface traits which are enduring dispositions to act in specific behavioral contexts Five surface traits are empirically investigated in the book compulsive buying sports participation healthy diet lifestyles proneness to bargaining and a tendency to frugality Across these five studies the empirical results reveal that the 3M model accounts for over 44% of the variance in the surface trait measures By presenting a new meta theory of motivation and personality that is testable Mowen s 3M model accounts for high levels of variance in consumer behavior By integrating the work of selected past and current theorists into a comprehensible whole the 3M model provides coherence in a field currently dominated by conflicting ideas theories and approaches The book provides evidence that by understanding the individual dispositions that underlie consumer behavior public policy officials and marketing specialists can develop better communication programs to influence and persuade their target audiences The book shows how to employ the 3M model to
