Following arthroscopic surgery on his right knee in 2006, Jerry Sorluccho faced a choice: Lose weight or eventually face artificial knee replacements for both knees. His orthopaedic surgeon laid it on the line: At age 69 and 270 pounds, his knees simply weren't going to last much longer; they would continue to break down under the pounding of all that weight. To avoid the knife, he would have to lose about a hundred pounds. A feat none of his patients had so far achieved in his many years of practice. So, as with many others, the surgeon began to mentally prepare Jerry for the latest and greatest artificial parts that lay in his future. Or so he thought. Breaking the mold, Jerry made one of the most important decisions of his life. Instead of accepting his surgeon's vision of his future, he decided instead to change his manner of living in order to lose weight. And lose weight he did, shrinking from 270 pounds to 168 in somewhat under two years. This is the story of how he did it without feeling deprived of anything, including the martini or two that he enjoys in the evening. True to his style, *The Two Martini Diet* is not your typical diet book. Jerry reaches out to the more than 60 million Americans and 300 million people worldwide who suffer from obesity and offers them hope and an example of how they too can change their life around. Using his research and writing skill, he lays out the dangers of our western diet and the values of eating healthy foods and of physical activity and exercise. While the book is technically correct, Jerry isn't a scientist. Consequently, it's written in layman's language and easy to understand. Catalog.
