Informatization and digitization are constantly changing every aspect of people's lives. With the support of technologies such as Internet+, big data, cloud computing, artificial intelligence and blockchain, people's production, life and way of thinking have undergone significant changes, which also profoundly affect the development of the education system. In 2021, Facebook founder Zuckerberg said that the metaverse was the next frontier and officially announced the company's name change to Meta<sup>[1]</sup>. Tech giant Microsoft also announced its full-scale entry into the metaverse, and the metaverse concept quickly swept the world. The year 2021 is also defined as the first year of the metaverse by the Internet, which has attracted great interest from governments, technology, finance, education and other fields. This also means that digital transformation has reached a whole new level, and a new digital era has opened up from now on.

Chinese Party Central Committee has made a series of important strategic plans around education modernization, digital China and digital transformation, and the 14th Five-Year Plan and the Long-Range Objectives Through the Year 2035 clearly put forward the following: to accelerate digital development, build a new advantage in digital economy<sup>[2]</sup>, collaborate To promote digitalization and industrial digital transformation, accelerate the pace of digital society construction, improve the level of digital government construction, create a good digital ecology, and build a digital China. government, digital transformation of the overall drive production methods, and drive the overall economic development.

In December 2022, CPC Central Committee and State Council issued the Opinions on Building a Data Infrastructure System to Better Play the Role of Data Elements. The Opinions point out that the construction of the data foundation system is related to the overall situation of national development and security. In order to accelerate the construction of the data foundation system, give full play to the advantages of China's massive data scale and rich application scenarios, activate the potential of data elements, make stronger, better and bigger digital economy, enhance the new momentum of economic development, and build a new national competitive advantage, relevant opinions are put forward.

In the field of foreign language education, from education system, organization form, teaching mode and learning paradigm, all of them are facing the challenges of brand new development in the digital era, and it is urgent for universities to carry out digital reform and innovation. The Art of Foreign Language Teaching Peter Lutzker, 2022-01-31. The first edition of this work became a standard reference work in the general context of humanistic approaches to foreign language teaching and learning. This new edition gives a brief overview of further developments in relevant fields and discusses the importance of the concept of teaching as an art in light of the increasing standardization and digitalization of education. Reviews of the 1st edition: I believe that the book will become a standard reference point for all those who, against the current tide of scientific objectives based test oriented control obsessed sterile approaches to language teaching, continue to believe that language teaching is indeed an art and a joyful art. At that Prof. Dr. Alan Maley in *English Language Teaching Journal*. Peter Lutzker is a major educational thinker and has spent half an earthly span living towards this major book. I have placed Peter's book on my shelves next to those of Rogers, Curran, Dufeu and Stevick. Mario Rinaluceri in *Humanising Language Teaching*.
