Roger L'Estrange and the Making of Restoration Culture Beth Lynch,2017-03-02 Roger L Estrange 1616 1704 was one of the most remarkable significant and colourful figures in seventeenth century England Whilst there has been regular if often cursory scholarly interest in his activities as Licenser and Stuart apologist this is the first sustained book length study

of the man for almost a century. L'Estrange's engagement on the Royalist side during the Civil war and his energetic pamphleteering for the return of the King in the months preceding the Restoration earned him a reputation as one of the most radical royalist apologists. As Licensor for the Press under Charles II he was charged with preventing the printing and publication of dissenting writings; his additional role as Surveyor of the Press authorised him to search the premises of printers and booksellers on the mere suspicion of such activity. He was also a tireless pamphleteer, journalist and controversialist in the conformist cause, all of which made him the bete noire of Whigs and non-conformists. This collection of essays by leading scholars of the period highlights the instrumental role L'Estrange played in the shaping of the political, literary and print cultures of the Restoration period. Taking an interdisciplinary approach, the volume covers all the major aspects of his career as well as situating them in their broader historical and literary context. By examining his career in this way, the book offers insights that will prove of worth to political, social, religious and cultural historians as well as those interested in seventeenth-century literary and book history.
