The Of Wine:

The Science of Wine Jamie Goode, 2021-06-08 An up to the moment new edition of Jamie Goode's celebrated wine science book. A thoroughly revised and updated third edition of this essential and groundbreaking reference gives a comprehensive overview of one of the most fascinating, important and controversial trends in the world of wine: the scientific and technological innovations that are now influencing how grapes are grown and how wine is made. Jamie Goode, an authority on wine science, details the key scientific developments relating to viticulture and enology, explains the practical application of science to techniques that are used around the world and explores how these issues are affecting the quality, flavor and perception of wine. The only complete and accessibly written resource available on the subject, *The Science of Wine* engagingly discusses a wide range of topics including terroir, the influence of soils on wine flavor, breeding new resistant grape varieties, the effects of climate change on grape growing, the role of yeasts and bacteria in winemaking and much more. A must-have reference for a wide audience of students, winemakers, wine professionals and general readers interested in the science of wine.

A History of Wine in America, Volume 2 Thomas Pinney, 2005-07-05 Describes how Prohibition devastated the wine industry, the conditions of renewal after Repeal, the various New Deal measures that affected wine and the early markets and methods. Goes on to examine the effects of World War II and how the troubled postwar years led to the great wine boom of the late 1960s, the spread of winegrowing in almost every state and its continued expansion to the present day.

The Science of Wine Jamie Goode, 2005 The Science of Wine does an outstanding job of integrating hard science about wine with the emotional aspects that make wine appealing. Patrick J. Mahaney, former senior Vice President for wine quality at Robert Mondavi Winery. Jamie Goode is a rarity in the wine world: a trained scientist who can explain complicated subjects without dumbing them down or coming over like a pointy head. It also helps that he's a terrific writer with a real passion for his subject. Tim Atkin, MW, *The Observer*.

Questions of Taste Barry C. Smith, 2013-02-05 Interest in and consumption of wine have grown exponentially in recent years and there has been a corresponding increase in consumers' knowledge of wine, which in turn has generated discussions about the meaning and value of wine in our lives and how renowned wine critics influence our subjective assessment of quality and shape public tastes. Wine first played a part in Western philosophy at the symposium of the early Greek philosophers where it enlivened and encouraged discussion. During the Enlightenment, David Hume recommended drinking wine with friends as a cure for philosophical melancholy, while Immanuel Kant thought wine softened the harsher sides of men's characters and made their company more convivial. In *Questions of Taste*, the first book in any language on the subject, philosophers such as Roger Scruton and wine professionals like Andrew Jefford, author of the award-winning book *The New France*, turn their attention to wine as an object of perception, assessment and appreciation. They and their fellow contributors examine the relationship between a wine's qualities and our knowledge of them, the links between the scientifically describable properties of wine and the conscious experience of the

wine taster what we base our judgements of quality on and whether they are subjective or objective the distinction between the cognitive and sensory aspects of taste whether wine appreciation is an aesthetic experience the role language plays in describing and evaluating wines the significance of their intoxicating effect on us the meaning and value of drinking wine with others whether disagreement leads to relativism about judgements of taste and whether we can really share the pleasures of drinking Questions of Taste will be of interest to all those fascinated by the production and consumption of wine and how it affects our minds in ways we might not hitherto have suspected
