everyday life is experienced and performed and the ways in which contemporary architects and interior designers draw on personal and collective histories in their practice Historians and theorists working within a range of disciplinary contexts and historiographical traditions are turning to biography as means of exploring and accounting for social cultural and material change and this volume reflects that turn representing the fields of architectural and design history social history literary history creative writing and design practice Topics include masters and servants in eighteenth century English kitchens the lost interiors of Oscar Wilde's House Beautiful Elsa Schiaparelli's Surrealist spaces Jean Genet outlaws and the interiors of marginality and architect Lina Bo Bardi's Glass House S Paulo Brazil **Madness, Art, and Society** Anna

Singleness in Britain, 1960-1990: Identity, Gender and Social Change Emily Priscott, 2020-07-07 This book contributes to an emerging field of research looking at the significance of marital status to debates about identity and gender It examines representations and experiences of single men and women between 1960 and 1990 using a wide variety of sources including

digitized British newspapers social research films and lifestyle literature Whilst much existing work focuses on the early to mid 20th centuries such as Katherine Holden's ground breaking work *The Shadow of Marriage Singleness in England 1914* 1960 this book alternatively examines the impact of the 1960s and the aftermath of changing attitudes to singleness While Holden and others such as Virginia Nicholson in *Singled Out* focus largely on social status and lived experience often through oral testimony the author is just as interested in finding new ways of looking at gender and sexuality This work starts from the premise that a distinct double standard existed in attitudes towards single men and women which continued even after the wave of legislation to improve women's status during the 1960s Examining these often vastly different expectations reveals a complex web of progress continuity and contradictions highlighting the uneven pace of social change and its frequent compromises and limitations Using theoretical approaches such as feminism and queer theory this work explores the impact of changing gender norms on issues including single fatherhood old maid stereotypes and experiences of homelessness It can be used as a study aid for 20th century British history and gender studies courses and might also interest both established academics and intellectually curious non academic readers The author has made efforts where possible to clearly explain her theoretical approaches and interventions for those who might be unfamiliar with them
