**The Concept of Sat in Advaita Vedānta** Raman Karunakaran, 1980

Existence and Enlightenment in the Laṅkāvatāra-Sūtra Florin Giripescu Sutton, 1991-01-01 This book offers a systematic analysis of one of the most important concepts characterizing the Yogic School of Buddhism the last

creative stage of Indian Buddhism as outlined and explained in one of its most authoritative and influential texts *La k vat ra S tra* Compiled in the second half of the fourth century A D this sutra not only represents a comprehensive synthesis of both early and late religio philosophical ideas crucial to the understanding of Buddhism in India but it also provides an insight into the very early roots of the Japanese Zen Buddhism in the heart of the South Asian esotericism The first part of the book outlines the three fold nature of Being as conceptualized in Buddhist metaphysics The author uses an interpretive framework borrowed from the existentialist philosophy of Heidegger in order to separate the transcendental Essence of Being from its Temporal manifestation as Self and from its Spatial or Cosmic dimension The second part clarifies the Buddhist approach to knowledge in its religious transcendental sense and it shows that the Buddhists were actually first in making use of dialectical reasoning for the purpose of transcending the contradictory dualities imbedded in the common ways of perceiving thinking and arguing about reality

Buddhism and American Thinkers Kenneth K. Inada, Nolan Pliny Jacobson, 1984-01-01

In *Buddhism and American Thinkers* leading scholars explore Buddhist influences on the currents of American thought The essays presented here advance a continuing dialogue between East and West and show how Buddhism has made ever deepening penetrations into the very substratum of American thinking Contributors to this volume share a concern with ideas that constitute a common core of Buddhist and American philosophy Each relates Buddhism to a factor in American thinking exploring the numerous ways in which Buddhist perspectives on personal identity human suffering and alienation the nature of compassionate love and the social nature of ultimate reality amplify and clarify perspectives found in the golden age of American philosophy particularly in the thought of William James Josiah Royce Alfred North Whitehead John Dewey Charles Sanders Peirce and Charles Hartshorne the great living American philosopher *Buddhism and American Thinkers* brings new light to the interrelationship between an ancient orientation to life and the very deepest ideas in the history of American thought

A Critical Analysis of Bhima Bhoi and the Mahima Cult Nishamani Kar, 2024-05-15

A *Critical Analysis of Bhima Bhoi and the Mahima Cult* is a rare compendium of insightful essays by eminent Indian scholars on the Mahima Cult its genesis and its growth The volume focuses on Bhima Bhoi the poet philosopher and the prime interlocutor of the Renegade Faith who started a revolt from below to champion human rights To critically appreciate the Saint poet Bhima Bhoi and the Mahima Cult Dharma of Glory the history of the 19th century Indian sociocultural system especially that of Odisha and its adjoining states needs to be reconstructed Since there is no surviving oral and written text authored by the founder of the cult Mahima Swami it is only the unlettered genius Bhima Bhoi who produced innumerable prayers hymns and poetic recitals of profound philosophical import which made him the legend the poet archivist and historiographer of the Mahima Cult Bhima was simultaneously the poet of the soul and the soil who used theology and social experience to provide a supportive sub structure to a transcendent ecstatic vision This volume asserts that Mahima Dharma is an autochthonous reform movement and a regional variation of the Indian Bhakti tradition and mystical poetry

Bernd Herzogenrath,2022-12-01 This book foregrounds that English monolingualism reduces both our linguistic and conceptual resources presenting concepts from the cultures of 4 continents and 26 languages Concepts seem to work best when created in the interspace between theory and praxis and between philosophy art and science Deleuze himself had generated many concepts in this encounter between philosophy and non philosophy including his ideas of affects and percepts of becoming the stutter the rhizome movement image and time image the rhizome What happens if instead of other disciplines we take other cultures other languages other philosophies Does not the focus on English as a hegemonic language of academic discourse deny us a plethora of possibilities of possible Denkfiguren of possible concepts Each contributor explores ideas that are key to thinking in their language about sound and silence voice and image living and thinking the self and the world while simultaneously addressing the issue of translation Each chapter demonstrates that translation itself is a way of invention rather than just a rendering of concepts from one system in terms of another This collection acts as a travelogue The journey does not follow a particular trajectory some countries are not on the map some are visited twice So there is no claim to completeness involved here it is rather an invitation to answer to the call      **Beyond Orientalism** Fred Dallmayr,1996-12-12 Beyond Orientalism explores the confluence of contemporary Western especially Continental philosophy with its focus on otherness and difference and the ongoing process of globalization or the emergence of the global village The basic question raised in the book is What will be the prevailing life form or discourse of the global village Will it be the discourse of Western science industry and metaphysics which under the banner of modernization and development seeks to homogenize the world in its image In Said s work this strategy was labeled Orientalism Or will it be possible to move beyond Orientalism in the direction neither of global uniformity nor radical fragmentation After discussing the broad range of possible modes of cross cultural encounter in a historical perspective the book develops as a preferred option the notion of a deconstructive dialogue or a hermeneutics of difference which respects otherness beyond assimilation This hermeneutics is illustrated in chapters examining several bridge builders between cultures primarily the Indian philosophers Radhakrishnan and J L Mehta and the Indologist Halbfass The remaining chapters are devoted to more concrete social political problems including issues of modernization multiculturalism and the prospects of a globalized democracy which bids farewell to Orientalism and Eurocentrism      *Kaleidoscopic Reflections* Sindhu Rajasekaran,2010-09-01 As the turquoise jasper sapphire and amethyst contrive with light to reflect eclectic patterns in a kaleidoscope so does Kadhambini s family and society She chronicles three disrupted yet connected series of events occurring at discrete instants of time all bound by the inner contradictions involved in the experiences of the world by its characters This is a tale of a Tamil family spanning five generations and how their destiny is inextricably linked to the fate of the land of contradictions India      Mathematics in

Society and History S. Restivo, 2013-12-01 This is the first book by a sociologist devoted exclusively to a general sociology of mathematics The author provides examples of different ways of thinking about mathematics sociologically The survey of mathematical traditions covers ancient China the Arabic Islamic world India and Europe Following the leads of classical social theorists such as Emile Durkheim Restivo develops the idea that mathematical concepts and ideas are collective representations and that it is mathematical communities that create mathematics not individual mathematicians The implications of the sociology of mathematics and especially of pure mathematics for a sociology of mind are also explored In general the author's objective is to explore conjecture suggest and stimulate in order to introduce the sociological perspective on mathematics and to broaden and deepen the still narrow shallow path that today carries the sociology of mathematics This book will interest specialists in the philosophy history and sociology of mathematics persons interested in mathematics education students of science and society and people interested in current developments in the social and cultural analysis of science and mathematics
