The Conserver Society A Workable Alternative For The Future:

The Conserver Society Kimon Valaskakis,1979 The Conserver Society : a Workable Alternative for the Future
Kimon Valaskakis,1979 Life in 2030 John B. Robinson,2007-10-01 Life in 2030 is a ground breaking practical and above all positive vision of life in twenty first century Canada As we move into the next century the development of sustainable and environmentally benign patterns of resource utilization and socioeconomic development is an essential priority In this book John Robinson and his co authors investigate the possibility and impacts of a sustainable future for Canada Based on research initiated by the Sustainable Society Project in 1988 Life in 2030 is unique in that it uses backcasting instead of forecasting to trace the path of Canada forty years into the future to the year 2030 Instead of predicting the most likely future based on current trends the authors set out a desirable future and discuss the changes that would need to occur between 1990 and 2030 to arrive at this future vision This vision derived from ethical political and ecological principles is not viewed as definitive for the authors hope to inspire others to conceive of and work towards their own visions of a sustainable future Life in 2030 makes a significant contribution to interdisciplinary studies on the environment and sustainability because it develops a scenario that allows for an evaluation of the changes required to achieve a sustainable society This book is required reading for anyone interested in a sustainable future environment It also provides an original and provocative look at life in Canada in the twenty first century **The Conserver Society** Kimon Valaskakis,1979 **The Conserver Society** Karl E. Henion,Thomas C. Kinnear,American Marketing Association,1979 **The Earth as Transformed by Human Action** B. L. Turner,William C. Clark,Robert W. Kates,John F. Richards,Jessica T. Mathews,William B. Meyer,1993-01-29 The Earth as Transformed by Human Action is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world The purpose of such a study is to document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes The first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action The final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere **The Fourth Wave** Herman Bryant Maynard,Susan E. Mehrtens,1996 1576750027The Fourth Wave foresees a radically different future a future in which business principles concern for the environment personal integrity and spiritual values are integrated It looks toward a future in which today's corporations serve both local and global society advocate a redefinition of wealth are innovators *Global Environmental Risk* Jeanne X. Kasperson,Roger E. Kasperson,2013-05-13 Despite international initiatives such as the Earth Summit in 1992 and ongoing efforts to implement the Kyoto Protocol human activities continue to register a destructive toll on the planetary environment At root research on global environmental risk seeks new pathways for reversing unsustainable trends curtailing

ongoing destructive activities and creating a life sustaining planet This book takes stock of the distinctive challenges posed by global environmental risks the capacity of knowledge systems to identify and characterize such risks and the competence of human society to manage the unprecedented complexity Particular attention trains on engaging in ways conducive to enhancing social learning and adaptation the large uncertainties inherent in these risks Various chapters enlist different scales of analysis to explore the manifestation and causes of global environmental risks in all the diversity of their regional expression Throughout the editors and contributors accord prominence to the vulnerability of people and places to environmental degradation Understanding vulnerability is a neglected key to assessing the nature of the risks and determining strategies for altering trajectories of threat Global risk futures the editors argue are not intractable and are still amenable to a risk analysis enterprise that is democratic in principle humanistic in concept and geared to the realities that pertain to the particular societies locales and regions that will ultimately bear the risk

certain to provoke controversy and a reconsideration of basic beliefs The Death of Industrial Civilization Joel Jay Kassiola,1990-08-14 The Death of Industrial Civilization explains how the contemporary ecological crisis within industrial society is caused by the values inherent in unlimited economic growth and competitive materialism Kassiola shows that the limits to growth critique of industrial civilization is the most effective stance against what seems to be a dominant and invincible social order He prescribes the social changes that must be implemented in order to transform industrial society into a sustainable and more satisfying one *Rethinking Freire and Illich* Rosa Bruno-Jofré,Michael Attridge,Jon Igelmo Zaldívar,2023-10-02 Marking the fiftieth anniversary of two of the most influential books in modern educational and social theory *Rethinking Freire and Illich* introduces readers to the results of the symposium of Paulo Freire's Pedagogy of the Oppressed and Ivan Illich's Deschooling Society The collection uniquely analyses Freire and Illich together although not in a comparative way It acknowledges that both Freire and Illich led in different ways to a new approach to perceiving and understanding the concept of liberation as a human condition while also presenting current criticisms of their work from a gendered perspective and by Indigenous scholars in the US and Canada Drawing on contributions from historians of education theologians digital experts and philosophers of education the book offers a historical analysis using extensive primary sources and an originality of topics It introduces the ways in which the current generation reads the overall works of Freire and Illich in the search for a reconstructed democratic education As a result *Rethinking Freire and Illich* presents Freire and Illich in light of contemporary issues in this generation and offers renewed searches for a good and just life and a reconstructed democratic education *New Thinking for a New Millennium* Richard A.
