The Contextualization Of Language:

The Contextualization of Language Peter Auer,Aldo Di Luzio,1992 This volume suggests a novel treatment of context in the analysis of everyday interaction On a theoretical level it advocates a switch of focus from context as a preestablished monolithic category which constringes co participants verbal and nonverbal behaviour to an active notion of contextualization in order to make oneself understood participants have to establish and maintain those shared contextual frames which in turn are relevant to the local interpretation of their verbal and nonverbal activities On an empirical level the volume contains exemplary analyses that show how participants employ contextualization cues of prosodic rhythm intonation tempo etc or nonverbal gaze gesture etc nature in order to achieve context The volume is also an appraisal of the theory of contextualization developed by John Gumperz In their contributions researchers from various schools of research such as conversation analysis micro ethnography phonetics phonology and metapragmatics relate their work to this theory **The Contextualization of Language** Peter Auer,Aldo Di Luzio,1992-06-11 This volume suggests a novel treatment of context in the analysis of everyday interaction On a theoretical level it advocates a switch of focus from context as a preestablished monolithic category which constringes co participants verbal and nonverbal behaviour to an active notion of contextualization in order to make oneself understood participants have to establish and maintain those shared contextual frames which in turn are relevant to the local interpretation of their verbal and nonverbal activities On an empirical level the volume contains exemplary analyses that show how participants employ contextualization cues of prosodic rhythm intonation tempo etc or nonverbal gaze gesture etc nature in order to achieve context The volume is also an appraisal of the theory of contextualization developed by John Gumperz In their contributions researchers from various schools of research such as conversation analysis micro ethnography phonetics phonology and metapragmatics relate their work to this theory

or embedded in other states of mind Moreover the experience of emotions may be influenced not only by culture but also by individual language Analysis is further complicated by the fact that emotions are abstract and require complex linguistic coding to make an invisible emotional state of the speaker at least rudimentarily visible to the listener For this reason the present volume aims to investigate the perception encoding reception and influence potential of emotions in context and across languages using different corpora The following questions are central To what extent do emotions influence our perception of events and facts and To what extent can emotion concepts be defined language specifically but also universally on the basis of our perception Therefore the eight contributions analyze emotions in different contexts and from different starting points to uncover the cognitive mechanisms underlying the perception and influence of emotion concepts The first four papers focus primarily on emotional and sensory experiences and interactions that are set in motion when we are confronted with emotions while the following four focus on the different facets of emotion across languages to show which emotion concepts are language specific or universal and thus contribute to a better understanding of this complex field
