Schneider, Jerrold M. Post, 2003 Profiles the personalities and strategic cultures of some of the United States most dangerous international rivals *Next Steps in Iraq* United States. Congress. Senate. Committee on Foreign Relations, 2002 Weapons Proliferation and War in the Greater Middle East Richard L. Russell, 2007-05-07 This important new book explores the strategic reasons behind the proliferation of nuclear biological and chemical weapons as well as ballistic missile delivery systems in the Greater Middle East It examines the uses and limitations of chemical weapons in regional combat ballistic missile warfare and defenses as well as Iran's drive for nuclear weapons and the likely regional reactions should Tehran acquire a nuclear weapons inventory This book also discusses Chinese assistance to WMD and ballistic programs in the Greater Middle East Finally this book recommends policy options for American diplomacy to counter the challenges posed by WMD proliferation This essential study prepares the ground for the challenges facing the international community Richard Russell is a professor at the National Defense University's Near East South Asia Center for Strategic Studies in Washington DC He also teaches at the Security Studies Program at Georgetown University He previously served as a political military analyst at the CIA The Saddam Tapes Kevin M. Stout, 2011-09-26 During the 2003 war that ended Saddam Hussein's regime coalition forces captured thousands of hours of secret recordings of meetings phone calls and conferences Originally prepared by the Institute for Defense Analyses for the Office of the Undersecretary of Defense for Policy this study presents

annotated transcripts of Iraqi audio recordings of meetings between Saddam Hussein and his inner circle The Saddam Tapes along with the much larger digital collection of captured records at the National Defense University's Conflict Records Research Center will provide researchers with important insights into the inner workings of the regime and it is hoped the nature of authoritarian regimes more generally The collection has implications for a range of historical questions How did Saddam react to the pressures of his wars How did he manage the Machiavellian world he created How did he react to the signals and actions of the international community on matters of war and peace Was there a difference between the public and the private Saddam on critical matters of state A close examination of this material in the context of events and other available evidence will address these and other questions

*Fighting for Credibility* Frank P. Harvey, John Mitton, 2017-01-18 When Bashar al Assad used chemical weapons against his own people in Syria he clearly crossed President Barack Obama's red line At the time many argued that the president had to bomb in order to protect America's reputation for toughness and therefore its credibility abroad others countered that concerns regarding reputation were overblown and that reputations are irrelevant for coercive diplomacy Whether international reputations matter is the question at the heart of *Fighting for Credibility* For skeptics past actions and reputations have no bearing on an adversary's assessment of credibility power and interests alone determine whether a threat is believed Using a nuanced and sophisticated theory of rational deterrence Frank P Harvey and John Mitton argue the opposite ignoring reputations sidesteps important factors about how adversaries perceive threats Focusing on cases of asymmetric US encounters with smaller powers since the end of the Cold War including Bosnia Kosovo Iraq and Syria Harvey and Mitton reveal that reputations matter for credibility in international politics This dynamic and deeply documented study successfully brings reputation back to the table of foreign diplomacy

Preventive Attack and Weapons of Mass Destruction Lyle Goldstein, 2006 This comprehensive survey of weapons of mass destruction WMD rivalries places the Bush Doctrine of preemption in historical context arguing that instability fueled by first strike incentives is an inherent byproduct of WMD proliferation

focus of attention today      A Higher Form of Killing Robert Harris,Jeremy Paxman,2007-12-18 A Higher Form of Killing opens with the first devastating battlefield use of lethal gas in World War I and then investigates the stockpiling of biological weapons during World War II and in the decades afterward as well as the inhuman experiments conducted to test their effectiveness This updated edition includes a new Introduction and a new final chapter exposing frightening developments in recent years including the black market that emerged in chemical and biological weapons following the breakup of the Soviet Union the acquisition of these weapons by various Third World states the attempts of countries such as Iraq to build up arsenals and particularly and most recently the use of these weapons in terrorist attacks      *The Evolution of Nuclear Strategy* L. Freedman,2003-07-18 First published twenty years ago Lawrence Freedman's Evolution of Nuclear Strategy was immediately acclaimed as the standard work on the history of attempts to cope militarily and politically with the terrible destructive power of nuclear weapons It has now been rewritten drawing on a wide range of new research and updated to take account of the period following the end of the cold war taking the story to contemporary arguments about missile defence      **Detering America** Derek D. Smith,2006-05-25 Faced with America's military superiority many countries are turning to weapons of mass destruction WMD as a means to deter United States intervention However the events of September 11 awakened America to a degree of vulnerability it had never experienced before making it increasingly unwilling to tolerate such weapons in the hands of unstable and unpredictable regimes Through theoretical historical and prescriptive lenses this book explores the modern security dilemma created by the twin fears of American encroachment and vulnerability which form a vicious cycle of insecurity that challenges traditional notions of deterrence Using Iraq and North Korea as case studies Smith argues that the United States may need to re evaluate its foreign policy strategies against WMD proliferation giving renewed attention to defensive measures negotiated disarmament interdiction and perhaps preemption      Nuclear Superiority David S. McDonough,2013-02-01 In 2002 the Bush administration completed a Nuclear Posture Review that introduced a new triad based on offensive strike systems defences and a revitalized defence infrastructure The new triad is designed for a new strategic threat environment characterized not by a long standing nuclear rivalry with another superpower but by unstable relationships with rogue state proliferators alongside more ambiguous relations with nuclear weapon powers Providing a historical context to these modifications to US nuclear strategy Nuclear Superiority details how the new triad which strongly emphasizes the need to bolster the credibility of the nuclear deterrent and to prepare for nuclear use when deterrence fails is founded on previous efforts to secure nuclear superiority against the Soviet Union and counter proliferation capabilities against WMD proliferant adversaries It illustrates how the evolution of American nuclear strategy towards more effective counter force capabilities regardless of the current threat environment has led to a host of counter force developments David S McDonough explores how this strategy is based on the long standing American desire to control conflict escalation and how it may invite crisis instability with regional adversaries and disquiet among

established nuclear powers      *What They Think of Us* David Farber, 2009-01-10 It has never been more important for Americans to understand why the world both hates and loves the United States In *What They Think of Us* a remarkable group of writers from the Middle East Europe Asia and Latin America describes the world's profoundly ambivalent attitudes toward the United States before and since 9/11 While many people around the world continue to see the United States as a model despite the Iraq war and the war on terror the U.S. response to 9/11 has undoubtedly intensified global anti-Americanism *What They Think of Us* reveals that substantial goodwill toward America still exists but that this sympathy is in peril and that there is an immense gap between how Americans view their country and how it is viewed abroad Drawing on broad research and personal experience while avoiding anecdotalism and polemics the writers gathered here combine political cultural and historical analysis to explain how people in different parts of the world see the United States They show that not all anti-Americanism can be blamed on U.S. foreign policy America is disliked not just for what it does but also for what it is and perceptions of both are profoundly shaped and sometimes warped by the domestic realities of the countries where anti-Americanism thrives In addition to analyzing America's battered global reputation these writers propose ways the United States and other countries can build better relations through greater understanding and respect      **Military Industry and Regional Defense Policy** Timothy D. Hoyt, 2017-07-05 *Military Industry and Regional Defense Policy* re-examines military industrialization in the developing world focusing on policy making in producer states and the impact of security perceptions on such policy making Timothy D. Hoyt reassesses the role of regional state sub-systems in international relations and recent historical studies of international technology and arms transfers Looking at Israel Iraq and India the three most powerful regional powers in the Cold War era he presents an expert analysis of the three-sided phenomena of the regional hegemony the regional competitor and the small over-achiever This new book breaks away from existing literature on military industries in the developing world which has focused on their economic and development costs and benefits These past studies have used primitive methodologies that focus on the production of complete weapons systems a misleading gauge in a world of growing international defense cooperation They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict and of the defence planning and concerns that drove development of indigenous military industries in key regional powers This new text delivers an incisive new perspective      **The Middle East and South Asia 2019-2020** , 2019-10-09 More than a quarter of the world's population live in the Middle East and South Asia yet our knowledge and understanding of the region is often limited to news updates about the latest conflicts and crises This 53rd edition of the annually updated volume of the *World Today Series* provides important insights that take the reader beyond the headlines It offers detailed and up to date information about the politics economies and societies of the twenty-four states that make up the region Contemporary events are placed in their historical context through an examination of major civilizations and key historical events This volume introduces major themes that have shaped the region
