The Ethnographic Imagination Paul Willis,2013-05-28 In this book Paul Willis a renowned sociologist and ethnographer aims to renew and develop the ethnographic craft across the disciplines Drawing from numerous examples of his own past and current work he shows that ethnographic practice and the ethnographic imagination are vital to understanding the creativity and irreducibility of experience in all aspects of social and cultural practice Willis argues that ethnography plays a vital role in constituting

sensuousness in textual methodological and substantive ways but it can do this only through the deployment of an associated theoretical imagination which cannot be found simply there in the field He presents a bold and incisive ethnographically oriented view of the world emphasizing the need for a deep running social but also aesthetic sensibility In doing so he brings new insights to the understanding of human action and its dialectical relation to social and symbolic structures He makes original contributions to the understanding of the contemporary human uses of objects artefacts and communicative forms presenting a new analysis of commodity fetishism as central to consumption and to the wider social relations of contemporary societies He also utilizes his perspective to further the understanding of the contemporary crisis in masculinity and to cast new light on various lived everyday cultures at school on the dole on the street in the Mall in front of TV in the dance club This book will be essential reading for all those involved in planning or contemplating ethnographic fieldwork and for those interested in the contributions it can make to the social sciences and humanities *Word-of-Mouth in*

substructuring and substructure analysis massachusetts - Feb 12 2023

the basic substructuring idea is to consider a substructure a part of the model separately and eliminate all but the degrees of freedom needed to connect this part to the rest of the model so that the substructure appears in the model as a substructure a collection of finite elements whose response is defined by the stiffness and mass o
