A Corpus of Rembrandt Paintings V Ernst van de Wetering, 2013-12-12 This volume is the fifth volume of A Corpus of Rembrandt Paintings a project devoted to all Rembrandt s paintings This is the work of The Rembrandt Research Project consisting of a group of scholars led since 1993 by Professor Ernst van de Wetering The project began in 1968 with the aim of separating Rembrandt s own paintings from the vast number of Rembrandtesque paintings made by his many apprentices and followers Having opted for a chronological approach to the cataloguing of Rembrandt s paintings from 1625 till 1642 in the first three volumes it was decided in 1993 to adopt a thematic approach for further volumes This was largely to facilitate the recognition of different hands The new approach yielded much more information not only about Rembrandt s working methods but also about the function and meaning of his works This expanded field of view meant that etchings and drawings with similar themes also needed to be included In 2005 Volume IV appeared devoted to Rembrandt s self portraits in painting etching and drawing Volume V consists of a catalogue and analysis of the so called small scale history and genre paintings That theme was chosen because this type of complex work shows a variety of full length protagonists acting in different narrative settings For this reason in the 17th century painting etching or drawing biblical and mythological scenes was looked upon as an artist s greatest challenge The choice of this theme proved to be highly fruitful in several ways Small scale history pieces reveal Rembrandt s artistic ambitions most clearly They also offer the authors a much more accurate view of the daily routine in

Rembrandt's studio his apprentices mostly copied this type of work or used it as a starting point for their own. As a result it was easier to distinguish the works by the master himself from those of his pupils. All aspects of the skills necessary to create a pictorial illusion play a part in the creation of small figured history paintings. These aspects were referred to as the basis of the noble art of painting in Rembrandt's days. Two seventeenth-century painter-theoreticians discussed these principles systematically in two books which up till now have only sporadically been consulted in the context of 17th-century studio practice. Karel van Mander wrote his *Grond der edel vry schilderconst* Basis of the Art of Painting in 1604 and Samuel van Hoogstraten produced his *Inleyding tot de hooge schoole der schilderconst* Academy of Painting in 1678. Van Hoogstraten was a pupil of Rembrandt between 1642 and 48. Comparing the two books and considering them in relation to Rembrandt's oeuvre gradually reveals his original views on painting and how these had developed during his career. Thus the authors of this new Volume of *A Corpus* have gained an unexpected and profound insight into Rembrandt's ideas and approach to his art. The basic aspects of painting included the following topics: function and methods of drawing human proportions, various positions, poses and gestures of figures, ways of arranging a scene's protagonists in a composition, facial expressions of a variety of emotions, light shadows and reflected light, landscape and animals, draperies and articles of clothing, methods of painting and various characteristics and uses of colours. The way these basic aspects were selected and dealt with presumed that the more practical side to the art of painting would be learned by the apprentice in the daily routine of his master's studio. With the development of art history in the nineteenth century the basic aspects of the art of painting listed above acquired the vague label of style. However the seventeenth-century categorization of the basic aspects provides a much more acute means of probing the views and criteria for judging a painting by Rembrandt and his contemporaries than the concept of style. Volume V in the series *A Corpus of Rembrandt Paintings* breaks new ground from the point of view of art history not only in its approach to Rembrandt as an artist but more particularly to his thinking about painting. Moreover a detailed comparison of Rembrandt's works and those by his apprentices who based their works on his led to a profound and detailed understanding of Rembrandt's views on pictorial quality. In art historical literature quality usually does not feature prominently since it is regarded as being too subjective. This comparative approach together with the analysis of seventeenth-century categories of thought about painting have given the research on Rembrandt a new impetus at the same time allowing us to see more clearly through seventeenth-century eyes. That is why the new volume of the *Corpus* is an important publication not only for art historians but also for all who want to fully enjoy the numerous works of art that date back to the Dutch Golden Age now scattered in museums around the world.

John Constable's Skies John E. Thornes, John Constable, 1999-01-01 John Constable is arguably the most accomplished painter of English skies and weather of all time. For Constable the sky was the keynote, the standard of scale and the chief organ of sentiment in a landscape painting. But how far did he understand the workings of the forces of nature which created his favourite cumulus clouds portrayed in so many of

his skies over the landscapes of Hampstead Heath Salisbury and Suffolk And were the skies he painted scientifically accurate In this lucid and accessible study John Thornes provides a meteorological framework for reading the skies of landscape art compares Constable's skies to those produced by other artists from the middle ages to the nineteenth century analyses Constable's own meteorological understanding and examines the development of his painted skies In so doing he provides fresh evidence to identify the year of painting of some of Constable's previously undated cloud studies

Levie, P.J.J. van Thiel, 2012-12-06 Since the second half of the last century art historians realizing that the image of Rembrandt's work had become blurred with time have attempted to redefine the artist's significance both as a source of inspiration to other artists and as a great artist in his own right In order to carry on the work started by previous generations a group of leading Dutch art historians from the university and museum world joined forces in the late 1960s in order to study afresh the paintings usually ascribed to the artist The researchers came together in the Rembrandt Research Project which was established to provide the art world with a new standard reference work which would serve the community of art historians for the nearby and long future They examined the originals of all works attributed to Rembrandt taking full advantage of today's sophisticated techniques including radiography neutron activation autoradiography dendrochronology and paint sample analysis thereby gaining valuable insight into the genesis and condition of the paintings The result of this meticulous research is laid down chronologically in the following Volumes THIS VOLUME A Corpus of Rembrandt Paintings Volume I which deals with works from Rembrandt's early years in Leiden 1629 1631 published in 1982 A Corpus of Rembrandt Paintings Volume II covering his first years in Amsterdam 1631 1634 published in 1986 A Corpus of Rembrandt Paintings Volume III goes into his later years of reputation 1635 1642 published in 1990 Each Volume consists of a number of Introductory Chapters as well as the full Catalogue of all paintings from the given time period attributed to Rembrandt In this catalogue each painting is discussed and examined in a detailed way comprising a descriptive an interpretative and a documentary section For the authenticity evaluation of the paintings three different categories are used to divide the works in A Paintings by Rembrandt B Paintings of which Rembrandt's authorship cannot be positively either accepted or rejected and C Paintings of which Rembrandt's authorship cannot be accepted This volume Volume I contains 730 pages starting of with four introductory chapters and discussing 93 paintings In clear and accessible explanatory text all different paintings are discussed larded with immaculate images of each painting Details are shown where possible as well as the results of modern day technical imaging In this volume the first ever works by Rembrandt are discussed also using his etchings as comparison

Art, Technology and Nature Dr Jacob Wamberg, Dr Camilla Skovbjerg Paldam, 2015-09-28 Are art and technology coming into a closer relationship with nature Through a selection of innovative readings by international scholars this book argues that since 1900 we have experienced a renewed negotiation of the convergent triangle of art technology and nature analysing its shifting constellations in post medieval times Through this

negotiation art becomes truly complementary to technology in understanding nature's agencies and may gain an important role in adjusting technology's present utilitarian hegemony

Computational Approaches in the Transfer of Aesthetic Values from Paintings to Photographs Xiaoyan Zhang, Martin Constable, Kap Luk Chan, Jinze Yu, Wang Junyan, 2017-07-18 This book examines paintings using a computational and quantitative approach. Specifically, it compares paintings to photographs, addressing the strengths and limitations of both. Particular aesthetic practices are examined, such as the vista foreground to background organisation and the depth planes. These are analysed using a range of computational approaches, and clear observations are made. New generations of image capture devices, such as Google goggles and the light field camera, promise a future in which the formal attributes of a photograph are made available for editing to a degree that has hitherto been the exclusive territory of painting. In this sense, paintings and photographs are converging, and it therefore seems an opportune time to study the comparisons between them. In this context, the book includes cutting edge work examining how some of the aesthetic attributes of a painting can be transferred to a photograph using the latest computational approaches

Her bold and innovative paintings of flowers, landscapes, and animal bones have been admired and debated by critics and scholars for decades. In this book, we explore the life and work of Georgia O'Keeffe, examining the unique ways in which her art reflects the American experience. O'Keeffe was born in 1887 in Sun Prairie, Wisconsin. She grew up in a rural environment surrounded by the natural beauty of the Midwest. This early exposure to nature had a profound impact on her artistic development. O'Keeffe's paintings often feature enlarged, close-up views of natural objects, such as flowers, leaves, and animal bones. the Familiar Yuriko Saito, 2017-07-04 Yuriko Saito explores the nature and significance of the aesthetic dimensions of people's everyday life. Everyday aesthetics has the recognized value of enriching one's life experiences and sharpening one's attentiveness and sensibility. Saito draws out its broader importance for how we make our worlds environmentally morally as citizens and consumers. Saito urges that we have a social responsibility to encourage cultivation of aesthetic literacy and vigilance against aesthetic manipulation. Yuriko Saito argues that ultimately everyday aesthetics can be an effective instrument for directing the humanity's collective and cumulative world-making project for the betterment of all its inhabitants. Everyday aesthetics has been seen as a challenge to contemporary Anglo-American aesthetics discourse which is dominated by the discussion of art and beauty. Saito responds to controversies about the nature, boundary, and status of everyday aesthetics and argues for its legitimacy. She highlights the multi-faceted aesthetic dimensions of everyday life that are not fully accounted for by the commonly held account of defamiliarizing the familiar. *Celestial Sleuth* Donald W. Olson, 2013-10-02 For a general audience interested in solving mysteries in art history and literature using the methods of science, forensic astronomy is a thrilling new field of exploration. Astronomical calculations are the basis of the studies which have the advantage of bringing to readers both evocative images and a better understanding of the skies. Weather, facts, volcano studies, topography, tides, historical letters and diaries, famous paintings, military records, and the friendly assistance of experts in related fields add variety, depth, and interest to the work. The chosen topics are selected for their wide public recognition and intrigue involving artists such as Vincent van Gogh, Claude Monet, Edvard Munch, and Ansel Adams; historical events such as the Battle of Marathon, the death of Julius Caesar, the American Revolution, and World War II; and literary authors such as Chaucer, Shakespeare, Joyce, and Mary Shelley. This book sets out to answer these mysteries indicated with the means and expertise of astronomy, opening the door to a richer experience of human culture and its relationship with nature. Each subject is carefully analyzed. As an example, using the study of sky paintings by Vincent van Gogh, the analytical method would include computer calculations of historical skies above France in the 19th century, finding and quoting the clues found in translations of original letters by Van Gogh, making site visits to France to determine the precise locations when Van Gogh set up his easel, and what celestial objects are depicted. For each historical event influenced by astronomy, there would be a different kind of mystery to be solved. As an example, How can the phase of the Moon and time of moonrise help to explain a turning point of the American Civil War, the fatal wounding of Stonewall Jackson at Chancellorsville in 1863? For each literary reference to astronomy, it was determined which celestial objects were being described and making an argument that the author is describing an actual event. For example, what was the date of the moonlit scene when Mary Shelley first had the idea for her novel *Frankenstein*? These and more fun riddles will enchant and delight the fan of art and astronomy. *15-Minute Watercolor Masterpieces* Anna Koliadych, 2019-12-03 More than 50,000 copies sold.
