Skyview Canada:

Terra Nostra Jeffrey S. Murray, 2006-04-01 Maps have been invaluable throughout Canada's history. They promised fame and fortune to early merchant adventurers and guided army commanders. They legitimized a politician's dominion and allowed businessmen to stake new claims. And they helped ordinary citizens build communities. *The Industrial Transformation of Subarctic Canada* Liza Piper, 2010-01-01 Between 1821 and 1960 industrial economies took root in the North, transgressing political geographies and superseding the historically dominant fur trade. Imported southern scientists and sojourning labourers worked the Northwest, and its industrial history bears these newcomers' imprint. This book reveals the history of human impact upon the North. It provides a baseline grounded in historical and scientific evidence for measuring subarctic environmental change. Liza Piper examines the sustainability of industrial economies, the value of resource exploitation in volatile ecosystems, and the human consequences of northern environmental change. She also addresses northern communities' historical resistance to external resource development and their fight for survival in the face of intensifying environmental and economic pressures. **The Canadian Space Program** Andrew B. Godefroy, 2017-05-03 Canada's space efforts from its origins towards the end of the Second World War through to its participation in the ISS today are revealed in full in this complete and carefully researched history. Employing recently declassified archives and many never previously used sources, author Andrew B. Godefroy explains the history of the program through its policy and many fascinating projects. He assesses its effectiveness as a major partner in both US and international space programs, examines its current national priorities and capabilities, and outlines the country's plans for the future. Despite being the third nation to launch a satellite into space after the Soviet Union and the United States, being a major partner in the US space shuttle program with the iconic Canadarm, being an international leader in the development of space robotics, and acting as one of the five major partners in the ISS, the Canadian Space Program remains one of the least well-known national efforts of the space age. This book attempts to shed a clearer light on the progress made by the CSA thus far with more ambitious goals ahead. Technical information, diagrams, glossaries, a chronology, and extensive notes on sources are also included in this volume. Science, Technology and Canadian History Richard A. Jarrell, Norman R. Ball, 2006-01-01 The first Conference on the Study of the History of Canadian Science and Technology held in Kingston, Ontario, in November 1978 marks the emergence of a new Canadian discipline. This wide-ranging bilingual collection of papers and workshops includes contributions by some of the historians, scientists, educators, students, archivists, and government representatives present at the conference. The papers discuss the nature of the new field, its objectives, and the problems of resources, funding, publishing, and practical uses, which face historians of Canadian science and technology. Records of the workshops convey the flavour of excitement present at the conference. Included in the volume are an extensive bibliography and listings of museums and available collections, research in progress, and conference participants. **Mechanical Engineering at the National**

Research Council of Canada W.E. Knowles Middleton, 1984-04-12 W E Knowles Middleton continuing his series of books on the history of the National Research Council of Canada here presents a history of the challenges defeats and triumphs of mechanical engineering at the Council Throughout much of the history of the National Research Council the Division of Mechanical Engineering has been mostly preoccupied with problems of aeronautics During World War II the Division constituted an aeronautical laboratory The influence of individuals government departments and individuals all involved in supporting and demanding research into problems of mechanical engineering in Canada makes intriguing reading The volume will be of interest to those investigating the history of science and technology in Canada It will also be crucial to those interested in Canada s contribution to World War II on the fronts of technology and aeronautics **Art Et**

Committee on Remote Sensing. Geography Working Group, Robert A. Ryerson, 1982 **Time and a Place** Edward MacDonald, Joshua MacFadyen, Irené Novaczek, 2016-06-01 With its long and well documented history Prince Edward Island makes a compelling case study for thousands of years of human interaction with a specific ecosystem The pastoral landscapes red sandstone cliffs and small fishing villages of Canada's garden province are appealing because they appear timeless but they are as culturally constructed as they are shaped by the ebb and flow of the tides Bringing together experts from a multitude of disciplines the essays in Time and a Place explore the island's marine and terrestrial environment from its prehistory to its recent past Beginning with PEI's history as a blank slate a land scraped by ice and then surrounded by rising seas this mosaic of essays documents the arrival of flora fauna and humans and the different ways these inhabitants have lived in this place over time The collection offers policy insights for the province while also informing broader questions about the value of islands and other geographically bounded spaces for the study of environmental history and the crafting of global sustainability Putting PEI at the forefront of Canadian environmental history Time and a Place is a remarkable accomplishment that will be eagerly received and read by historians geographers scholars of Canadian and island studies and environmentalists St. Lawrence County Christopher Angus, Susan H. Wood, 2001 Since the days of the pioneers St Lawrence County's diverse waterways fertile soils and dense forests have drawn a rich cultural mix of peoples These early settlers built the colorful barns mills and lighthouses of a working community Over time the area was transformed by one of the world's busiest shipping lanes the St Lawrence Seaway by the great educational institutions of the valley and by modern industries like Corning the high tech creator of windows for the space shuttle St Lawrence County is bracketed by two great vacation meccas the Thousand Islands and the Adirondack Park Artist Frederick Remington's island retreat at Ingleneuk and Henry Rushton's Canton boat works are no longer with us but the port of Ogdensburg still boasts elegant nineteenth century homes Rushton's crafts can still be found at exhibitions at Paul Smith's College or gracing Lake Flower in the village of Saranac Lake Daily life in hamlets such as Star Lake North Creek and Blue Mountain Lake can still evoke a simpler time
