Wittman,2023-12-08 This innovative volume extends existing conversations on translation and modernism with an eye toward bringing renewed attention to its ethically complex appropriative nature and the subsequent ways in which modernist translators become co creators of the materials they translate Wittman builds on existing work at the intersection of the two fields to offer a more dynamic nuanced and wider lens on translation and modernism The book

draws on scholarship from descriptive translation studies polysystems theory and literary translation to explore modernist translators appropriation of source texts and their continuous recalibrations of equivalence between source text and translation Chapters focus on translation projects from a range of writers including Beckett Garnett Lawrence Mansfield and Rhys with a particular spotlight on how women s translations and women translators innovations were judged more critically than those of their male counterparts Taken together the volume puts forth a fresh perspective on translation and modernism and of the role of the modernist translator as co creator in the translation process This book will be of particular interest to scholars in translation studies modernism reception theory and gender studies **A Concise Companion to the Victorian**

explores the fascinating connections and tensions between creativity research and developmental psychology two fields that have largely progressed independently of each other until now In this book scholars influential in both fields explore the emergence of new ideas and the development of the people and situations that bring them to fruition The uniquely collaborative nature of Oxford s Counterpoints series allows them to engage in a dialogue addressing the key issues and potential benefits of exploring the connections between creativity and development Creativity and Development is based on the observation that both creativity and development are processes that occur in complex systems in which later stages or changes emerge from the prior state of the system In the 1970s and 1980s creativity researchers shifted their focus from personality traits to cognitive and social processes and the co authors of this volume are some of the most influential figures in this shift The central focus on system processes results in three related volume themes how the outcomes of creativity and development emerge from dynamical processes the interrelation between individual processes and social processes and the role of mediating artifacts and domains in developmental and creative processes The chapters touch on a wide range of important topics with the authors drawing on their decades of research into creativity and development Readers will learn about the creativity of children s play the creative aspects of children s thinking the creative processes of scientists the role of education and teaching in creative development and the role of multiple intelligences in both creativity and development The final chapter is an important dialogue between the authors who engage in a roundtable discussion and explore key questions facing contemporary researchers such as Does society suppress children s creativity Are creativity and development specific to an intelligence or a domain What role do social and cultural contexts play in creativity and development Creativity and Development presents a powerful argument that both creativity scholars and developmental psychologists will benefit by becoming more familiar with each other s work *World Literature Today* ,1991
