**Imaginative Arts Practice** Kathleen Connellan, 2019-03-27 In *Dreaming Healing and Imaginative Arts Practice* Kathleen Anne Connellan brings dream theory together with art practice and art psychotherapy to demonstrate how releasing the imagination can open up processes of healing. In this interdisciplinary and richly innovative book Connellan focuses on nocturnal dreams, day dreams, memory and reverie, and she explores how to access, depict, and use these dream images to discover personal healing. Unlike other dream journals, Connellan encourages visual recording and personal experimentation with a variety of materials and modalities regardless of artistic ability. Each chapter is divided into a theoretical and practical half, where the theoretical section addresses the foundations of dream theory and philosophy, and the practical section offers step-by-step exercises that lead you to the creation of something restorative. Connellan covers a theme in each chapter which helps merge the unconscious with the conscious, the nature of dreaming and the constitution of the psyche, the archetype and our shadow selves, belonging, moving pain and pleasure, and all the senses in remembering. *Dreaming Healing and Imaginative Arts Practice* is a unique blend of scholarly research, beautiful illustration, and hands-on practicality that allows the reader to interpret their dreams for self-expression and self-knowledge. This work will be of great interest to those studying postgraduate psychology, social work, art and arts therapy, and an essential resource for art therapists, creative therapists, alternative psychotherapists, and social workers in practice and in training.

*The Science and Art of Dreaming* Mark Blagrove, Julia Lockheart, 2023-02-10 *The Science and Art of Dreaming* is an innovative text that reviews the neuroscience and psychology of how dreams are produced, how they are recalled, and their relationship to waking life events and concerns of the dreamer. Featuring beautiful original artwork based on dream representations, the book delves deeply into what happens when we dream, the works of art we produce when asleep, and the relevance of dreaming to science, art, and film. The book examines the biological, psychological, and social causes of dreaming and includes recent advances in the study of nightmares and lucid dreaming. It shows how sleep can process memories and that dreams may reflect these processes, but also that dreams can elicit self-disclosure and empathy when they are shared after waking. The playfulness, originality, and metaphorical content of dreams also link them to art, and especially to the cultural movement that has most valued dreams: Surrealism. The book details the history of scientific research into dreams, including a re-reading of the two dreams of Freud's patient, the feminist hero Dora, and also the history of Surrealism and of films that draw on dreams and dream-like processes. Each chapter starts with a dream narrative and accompanying painting of the dream to highlight aspects of each of the chapter themes. This highly engaging book will be relevant to researchers, students, and lecturers in the fields of psychology, neuroscience, psychoanalysis, consciousness, and social evolution. It will also be of value within the study and practice of visual art, design, and film, and will be of interest to the general reader and anyone who holds a personal interest in their own dreams.
