Slow Death And Other Oklahoma Murders:

Slow Death. . . and Other Oklahoma Murders Mary Ellen Cooper, 2003-06 Carol Ann Heller thought she'd found the man of her dreams when she'd married Dennis Heller but less than a year later her health was shattered and she lay dying of a mysterious illness Only a sharp ER doctor suspected the truth too late to save her Then two tenacious investigators pursued the killer who condemned her to a SLOW DEATH And other stories of Oklahoma murders **The Slow Death of the Death Penalty** Todd C. Peppers, Jamie Almallen, Mary Welek Atwell, 2025-07-01 Why the death penalty is in decline across the United States Across the country the death penalty is dying Twenty two states have abandoned state sanctioned executions including nine in the last fifteen years Of the twenty eight states that still have the death penalty eight have not had an execution in over a decade And public support for the death penalty has declined from 80% of the surveyed population in the early 1990s to approximately 50% today As the death penalty slowly withers away Todd C Peppers Jamie Almallen and Mary Welek Atwell bring together a number of distinguished death penalty scholars activists and attorneys to take an accounting of the damage inflicted by the machinery of death Contributors to the book point to a range of different pathologies which have caused politicians and voters to turn against capital punishment from unacceptable rates of false convictions and racially motivated prosecutions to a clemency process poisoned by political factors Essay topics include various dimensions of the death penalty including racial and gender bias economic costs the conviction of juveniles the mentally ill and the factually innocent Supreme Court decisions and the failure of the death penalty to serve as a deterrent against crime This important volume is an up to date accounting of the current state and as the contributors argue the future demise of the death penalty

Killing Times David Wills, 2019-03-05 *Killing Times* begins with the deceptively simple observation made by Jacques Derrida in his seminars on the topic that the death penalty mechanically interrupts mortal time by preempting the typical mortal experience of not knowing at what precise moment we will die Through a broader examination of what constitutes mortal temporality David Wills proposes that the so called machinery of death summoned by the death penalty works by exploiting or perverting the machinery of time that is already attached to human existence Time Wills argues functions for us in general as a prosthetic technology but the application of the death penalty represents a new level of prosthetic intervention into what constitutes the human *Killing Times* traces the logic of the death penalty across a range of sites Starting with the legal cases whereby American courts have struggled to articulate what methods of execution constitute cruel and unusual punishment Wills goes on to show the ways that technologies of death have themselves evolved in conjunction with ideas of cruelty and instantaneity from the development of the guillotine and the trap door for hanging through the firing squad and the electric chair through today's controversies surrounding lethal injection Responding to the legal system's repeated recourse to storytelling prosecutors and politicians endless recounting of the horrors of crimes Wills gives a careful eye to the narrative even fictive spaces that surround crime and punishment Many of the controversies

surrounding capital punishment Wills argues revolve around the complex temporality of the death penalty how its instant works in conjunction with forms of suspension or extension of time how its seeming correlation between egregious crime and painless execution is complicated by a number of different discourses By pinpointing the temporal technology that marks the death penalty Wills is able to show capital punishment s expansive reach tracing the ways it has come to govern not only executions within the judicial system but also the opposed but linked categories of the suicide bombing and drone warfare In discussing the temporal technology of death Wills elaborates the workings both of the terrorist who produces a simultaneity of crime and punishment that bypasses judicial process and of the security state in whose remote control killings the time space coordinates of justice are compressed and at the same time disappear into the black hole of secrecy Grounded in a deep ethical and political commitment to death penalty abolition Wills s engaging and powerfully argued book pushes the question of capital punishment beyond the confines of legal argument to show how the technology of capital punishment defines and appropriates the instant of death and reconfigures the whole of human mortality

Is Killing Wrong? Mark Cooney,2009-10-07 Thou shalt not kill is arguably the most basic moral and legal principle in any society Yet while some killers are pilloried and punished others are absolved and acquitted and still others are lauded and lionized Why The traditional answer is that how killers are treated depends on the nature of their killing whether it was aggressive or defensive intentional or accidental But those factors cannot explain the enormous variation in legal officials and citizens responses to real life homicides Cooney argues that a radically new style of thought pure sociology can Conceived by the sociologist Donald Black pure sociology makes no reference to psychology to any single person s intent or even to individuals as such Instead pure sociology explains behavior in terms of its social geometry its location and direction in a multidimensional social space Is Killing Wrong provides the most comprehensive assessment of pure sociology yet attempted Drawing on data from well over one hundred societies including the modern day United States it represents the most thorough account yet of case level social control or the response to conduct defined as wrong In doing so it demonstrates that the law and morality of homicide are neither universal nor relative but geometrical as predicted by Black s theory

Encyclopedia of Juvenile Violence Laura L. Finley,2006-12-30 From concerns about juveniles incorrigibility at the turn of the century to school violence in the 1990s adults have attempted to understand control and prevent juvenile violence Yet juvenile violence takes many forms including both violence by juveniles and violence against juveniles and has various causes and consequences Since juvenile violence cannot be understood without examining the social context of a given time this comprehensive encyclopedia provides a historical overview of many significant time

periods and offers entries about many types of juvenile violence. It covers competing theories of youth violence issues such as gender, race, and educational status, and the criminal justice system's methods for dealing with both victims and offenders over time. Additionally, several topics that receive little attention in traditional volumes about juvenile violence, such as hazing and systemic violence in schools, are covered in these pages. Each entry utilizes current sources, making the book as up to date as possible. The front and back matter offer important information, including a chronological list of significant events related to juvenile violence and book and Web resources. Authors represent many different fields, including Sociology, Psychology, Education, History, Social Work, Political Science, Policing, and English. This offers readers a diversity of perspectives and information from a variety of sources. Confronting a difficult and often misunderstood subject, this encyclopedia is essential to a better understanding of juvenile violence. *The New York Times Index*, 1923
