Beckman, 2020-09-10 For knowledge management to be successful the corporate culture needs to be adapted to encourage the creation sharing and distribution of knowledge within the organization *Knowledge Organizations What Every Manager Should Know* provides insight into how organizations can best accomplish this goal Liebowitz and Beckman provide the information companies need for evaluating and planning the steps and processes that will transform their existing organization infrastructure into a knowledge based organization This easy to read guide includes many vignettes examples and short cases of organizations involved in knowledge management *The New Faces of Organizations in the 21st Century* Mohammad Ali Sarlak, 2010 [Knowledge Management Handbook](#) Jay

Liebowitz, 1999-02-25 Many organizations are now realizing that their competitive edge lies mostly in the brainpower the intellectual capital of their employees and management To stay ahead of the pack companies must leverage their knowledge internally and externally But it is not enough to develop lessons learned databases Experts now believe the current savior of organizations is knowledge management the conceptualization review consolidation and action phases of creating securing combining coordinating and retrieving knowledge in short the process of creating value from an organization's intangible assets Jay Liebowitz one of the leading knowledge management and expert systems authorities in the world brings together over thirty articles contributed by the top researchers and practitioners to produce what seems destined to become the key reference for this emerging field With it you will find How to create a knowledge sharing environment How senior executives can show tangible benefits using methods that value the intellectual capital especially the human capital within the organization How knowledge management is not the same as information management How senior management commitment and involvement are essential to the success of a knowledge management system *Corporate DNA* Arnold

Kransdorff, 2017-05-15 For more than half a century the developed world has been chasing productivity It's financed our wealth but that part of output on which our continued prosperity depends productivity growth is petering out The traditional scapegoat has been the dearth of worker skills But the worker skills base has never been higher The other explanation is that it is managers who are not giving full value to their employers The way they're making decisions is conferring virtually no upside potential which means they're leaving us wide open for experience poor competitors to step into our experience rich

shoes Exactly as Japan did in the 1960s and the so called BRICK countries Brazil Russia India China especially China and Korea are threatening now If creeping uncompetitiveness is not to overtake us from where are the next round of productivity gains to come from Identifying some gaping holes in the way managers are taught to manage this book outlines both the size of the problem and a solution Businesses and other organizations the author says have to substantially raise the quality of their decision making For this to happen they need to be much better experiential learners And for experiential learning to take place companies and other institutions have to better manage their corporate DNA the institution specific experiences otherwise known as Organizational Memory OM which characterizes any organization s ability to perform is the single biggest influence on decision making excellence It is a factor of production that has already been paid for at great expense yet is readily discarded in the backwash of the biggest change in workplace practice for more than a century the actively encouraged flexible labour market Corporate DNA explains why this key component of intellectual capital should be better managed can be better managed and particularly how it can be used to help organizations reduce the pandemic of repeated mistakes rei
