Feachem, 1992 Sick adults consume often more than half of all resources allocated to the health sector This volume draws attention to the causes and results of disease and ill health in adults in developing countries and to the burden they impose not only on individuals but on their families and society as well Researchers and policymakers will find this work essential because of its useful data on adult morbidity and mortality as well as its call for more information on problems and risk factors **Smoking and Health Bulletin**, 1986 **Smoking and World Health** United States. Murti, 1992 Tobacco use is widely recognized as the most important preventable cause of death and disease in the world today In most countries its use is synonymous with cigarette smoking but in some tobacco is more frequently used in other forms The health consequences of cigarette smoking and other forms of tobacco use encompass a wide spectrum of diseases including cancers of the mouth larynx lung pharynx and oesophagus diseases of the heart circulatory system and lungs and if used during pregnancy adverse effects on the foetus Even second hand passive smoking is shown to cause and influence the risks of diseases Tobacco control in any country however is not simply a health problem It has major implications for economics agriculture law and individual and social behaviour Therefore tobacco control must involve a multidimensional multidisciplinary approach In this volume the issue of tobacco control is addressed from many points of view by leading international experts in clinical medicine public health biostatistics and behavioural sciences agriculture law and policy analysis The articles provide an in depth overview of the various topics central to the theme of tobacco control This constitutes a valuable resource work on a subject of increasing concern containing state of the art reviews original research papers and thought provoking articles *Second Thoughts on Capitalism and the State* Leslie Sklair, 2022-05-02 This collection of essays highlights the need for sociological and political analysis of actual alternatives to capitalism and the existing system of so called nation states It challenges the conventional idea that capitalism can be successfully reformed to meet the needs of most people in the world confronting it with the existential threats posed by the perfect storm of climate change and the Anthropocene hyper urbanization and the Coronavirus pandemic Written over a period of 50 years it charts the ways in which capitalism and socialism have evolved as global systems their successes and failures to the point that it is

easier to imagine the end of the world than the end of capitalism It offers ways forward community by community
