among the business users of the integration partners on the one hand and among the IT experts of the integration partners on the other. Misunderstandings between any two negotiation partners potentially affect the agreements between all other negotiation partners.

The format of ICICS 2001 was selected to cover the complete spectrum of information and communications security and to promote participant interaction. The sessions were designed to promote interaction between the major topics of the conference: theoretical foundations of security, secret sharing, network security, authentication and identification, boolean functions and stream ciphers, security evaluation, signatures, block ciphers and public key systems, information hiding protocols and their analysis and cryptanalysis. The 29 member Program Committee considered 134 submissions from 23 different countries and regions; among them 56 papers were accepted for presentation.

In the Frontiers of Computational Science George Maroulis, Theodore Simos, 2005-10-28 This volume contains a collection of the lectures of the invited speakers and symposium organizers presented at the International Conference of Computational Methods in Science and Engineering, ICCMSE 2005, held in Corinth, Greece, October 2005. The content of the papers bears upon new developments of Computational Science pertinent to Physics, Chemistry, Biology, Medicine, Mathematics and Engineering. Molecular Science is a privileged ground for the application and evaluation of new mathematical tools and computational methods. In recent years, novelty and progress with greatest conceivable speed is common experience. This flavor of research findings, carrying many consequences for distant fields, is easily evidenced in the lectures collected in this volume.
