Students At Risk In At Risk Schools:

The At-Risk Student Evelyn Hunt Ogden, Vito Germinario, 1994-03-28 An excellent resource that should be on the desk of every student assistant professional as well as every administrator It gives step by step procedures in identifying high risk students who are a challenge for our schools

No Child Left Behind? Paul E. Peterson, Martin R. West, 2003-11-18 The 2002 No Child Left Behind Act is the most important legislation in American education since the 1960s The law requires states to put into place a set of standards together with a comprehensive testing plan designed to ensure these standards are met Students at schools that fail to meet those standards may leave for other schools and schools not progressing adequately become subject to reorganization The significance of the law lies less with federal dollar contributions than with the direction it gives to federal state and local school spending It helps codify the movement toward common standards and school accountability Yet NCLB will not transform American schools overnight The first scholarly assessment of the new legislation No Child Left Behind breaks new ground in the ongoing debate over accountability Contributors examine the law's origins the political and social forces that gave it shape the potential issues that will surface with its implementation and finally the law's likely consequences for American education

Students at Risk in At-Risk Schools Hersholt C. Waxman, 1992-02-19 What can educational leaders and teachers do to assist at risk students This volume examines educators responsibility for students who fail the dropout issue and school reform contributors also explore learning differences technologies available for learning effective classroom environments specific methods for improving leadership training programmes for education professionals and action plans for quality education

Learning to Fail Maynard R. Bemis Center for Evaluation, Development, and Research, 1991-01-01 This study of students at risk was conducted to determine who is at risk what puts students at risk what schools are doing to help those students and how effective these efforts are Data were collected on about 49 000 students and almost 10 000 teachers in over 275 schools in 85 U S communities and researchers conducted case studies of 65 young people This book presents 11 of these case studies of at risk public school students in the 1980s

Each chapter describes how risk manifests itself in a child's life and mind Each child is different Each story is set against a different landscape with a different home situation and different societal pressures and demands However many of the problems the children faced are the same as are many of their solutions Most of the children learned about failing from an early age These stories provide shocking examples of the lack of coordinated services for children at risk within our society and data about how children can be helped to overcome their problems and eventually become productive members of their

Teacher Training and Effective Pedagogy in the Context of Student Diversity Liliana

Minaya-Rowe, 2002-06-01 The purpose of this volume is two fold First the book attempts to initiate a research based dialogue from a variety of perspectives specifically about teacher training and teaching in the context of student linguistic and cultural diversity and second to cast a wide net over three major areas of professional development that have the potential to impact on teacher quality and on the educational services provided to ELLs at all levels of instruction This book represents a first attempt to a quiet revolution going on in teacher education Johnson 2000 It allows the reader to uncover research activities and experiences that constitute individual teacher education program initiatives A revolution because it is stirring the very essence of what stands at the core of teacher education a core that has long been based more on training to teach monolingual English speaking students and less on teaching ELLs their first and second language development using their bilingualism to teach academics and on the process of becoming an effective teacher of ELLs This state of the art review brings together research on effective pedagogy and teacher training The nine feature chapters are directly concerned with effective new structures and practices for professional development and are presented in a framework that considers a wide spectrum of topics to address issues such as what teachers need to understand about English language learners what kind of professional experiences are likely to facilitate those understandings and what kinds of teacher education programs and school settings are able to support their ongoing learning The authors also discuss the implications of their work for helping English language learners connect and benefit from school from the points of view of 1 school reform 2 teachers bilingual proficiencies 3 teachers knowledge and beliefs and 4 teacher training programming and sustainability *Schools and*

Dismantling Contemporary Deficit Thinking Richard R. Valencia, 2010-09-13 Deficit thinking is a pseudoscience founded on racial and class bias It blames the victim for school failure instead of examining how schools are structured to prevent poor students and students of color from learning *Dismantling Contemporary Deficit Thinking* provides comprehensive critiques and anti deficit thinking alternatives to this oppressive theory by framing the linkages between prevailing theoretical perspectives and contemporary practices within the complex historical development of deficit thinking *Dismantling Contemporary Deficit Thinking* examines the ongoing social construction of deficit thinking in three aspects of current discourse the genetic pathology model the culture of poverty model and the at risk model in which poor students students of color and their families are pathologized and marginalized Richard R Valencia challenges these three contemporary components of the deficit thinking theory by providing incisive critiques and discussing competing explanations for the pervasive school failure of many students in the nation s public schools Valencia also discusses a number

of proactive anti deficit thinking suggestions from the fields of teacher education educational leadership and educational ethnography that are intended to provide a more equitable and democratic schooling for all students **Resources in Education** ,2000-10
