Corpus Linguistics Ana María Hornero Corsico, Ana María Hornero, María José Luzón, Silvia Murillo Ornat, 2008 The aim of this volume is to present a state-of-the-art view on corpus studies. This collection of papers presented at the XII Susanne H. B. Seminar in November 2003 at the University of Zaragoza comprises both quantitative and qualitative analyses and studies on both written and oral corpora. Structured in seven sections, the book covers a wide range of approaches and methodologies and reflects current linguistic research. The papers have been written by scholars from a large number of universities, mainly from Europe but also from the USA and Asia. The volume offers contributions on diachronic studies, pragmatic analyses and cognitive linguistics as well as on translation and English for Specific Purposes. The book includes several papers on corpus design and reports on research on oral corpora. At a more specific level, the papers analyse aspects such as politeness issues, dialectology, comparable corpora, discourse markers, the expression of evidentiality and writer stance, metaphor and metonymy, conditional sentences, evaluative adjectives, delexicalised verbs and nominalization.

The Effects of Sex and Culture on the Apology Performance of Native English Speakers and Learners Elaheh Nosrati-rad, 2023-04-18 This book is an original empirical study which contributes to the knowledge and scholarship in the fields of variational interlanguage and cross-cultural pragmatics on a number of important levels. It highlights the potential influence of individual, regional and contextual variations on the language use of native speakers and pragmatic performance of English as a Foreign Language learners, arguing that factors such as gender operationalised via sex (e.g. female and male) and native culture should be considered in one single study. The book discusses the complexity of the influence of gender on language use, given that its influence may manifest in different ways in different cultures and contexts. Thus, researchers should focus on gender, culture and contextual variation when analysing language use conventions of native speakers and language learners, with data highlighting the role of gender in learners' first and second languages and cultures. The book also introduces findings which show the importance of cross-cultural comparison of Western Anglo-Saxon and

Middle Eastern Persian cultures in a single study and through a cross culturally comparable data collection method
