Studies in Cistercian Art and Architecture Meredith P. Lillich, 1993 **Studies in Medieval Stained Glass and Monasticism** Meredith P. Lillich, 2001 Professor Lillich has studied medieval stained glass the major painting medium of the Gothic era for forty years The articles in this volume discuss the development of stained glass in France from many perspectives such as the glaziers who produced it specific glazing techniques and formats of design evidence of the use of cartoons types and uses of grisaille and its stylistic development regional traditions in style iconography and hagiography as well as patrons and patronage often with a particular focus on specifically monastic characteristics requirements and achievements Also considered are displaced panels those dispersed to museums as well as spolia reused in later glazing campaigns and the reasons for such recycling Of particular interest is the development of stained glass in the late Capetian period from the aftermath of the High Gothic ensembles of Chartres and Bourges until the introduction of the revolutionizing technique of silver stain in the early fourteenth century Areas of special importance are those that developed in parallel to the royal style associated with the Ile de France the western French regions of Normandy and Aquitaine as well as to the east Lorraine at the francophone border and the county of Champagne [Investigations in Medieval Stained Glass](#) ,2019-06-07
