Studies In Insular Art And Archaeology:

Farrell, 1991 This volume inaugurates a new series of American Early Medieval Studies Amongst the areas covered are the decoration of wooden architecture Picts and Vikings in northern Scotland Irish medieval lake dwellings Irish and Viking age coinage and metalwork **Medieval Iconography**

John B. Friedman, Jessica M. Wegmann, 2021-11-18 First published in 1998 the present volume aims to help the researcher locate visual motifs whether in medieval art or in literature and to understand how they function in yet other medieval literary or artistic works **Landscapes of the Learned** Elizabeth FitzPatrick, 2023-04-15 Gaelic literati were an elite and influential group in the social hierarchy of Irish lordships between c 1300 and 1600 From their estates they served Gaelic and Old English ruling families in the arts of history law medicine and poetry They farmed kept guest houses conducted schools and maintained networks of learning In other capacities they were involved in political assemblies and memorializing dynastic histories in landscape This book presents a framework for identifying and interpreting the settings and built heritages of their estates in lordship borderscapes It shows that a more textured definition of what this learned class represented can be achieved through the material record of the buildings and monuments they used and where their lands were positioned in the political map Where literati lived and worked are conceived as expressions of their intellectual and political cultures Mediated by case studies of the landscapes of their estates dwellings and schools the methodology is predominantly field based using archaeological investigation and topographic and spatial analyses and drawing on historical and literary texts place names and lore in referencing named people to places More widely the study contributes a landscape perspective to the growing body of work on autochthonous intellectual culture and the exercise of power by ruling families in late medieval and early modern northern European societies **Roman Infrastructure in Early Medieval Britain**

Mateusz Fafinski, 2025-10-01 Early Medieval Britain was more Roman than we think The Roman Empire left vast infrastructural resources on the island These resources lay buried not only in dirt and soil but also in texts laws chronicles charters even churches and landscapes This book uncovers them and shows how they shaped Early Medieval Britain Infrastructures material and symbolic can work in ways that are not immediately obvious and exert an influence long after their creators have gone Infrastructure can also rest dormant and be reactivated with a changed function role and appearance This is not a simple story of continuity and discontinuity It is a story of adaptation and transformation of how the Roman infrastructural past was used and re used and also how it influenced the later societies of Britain **The Lindisfarne Gospels** Michelle P. Brown, 2003-01-01 First published 2003 by The British Library London T p verso

Between earth and heaven Johanna Kramer, 2016-05-16 Between earth and heaven examines the teaching of the theology of Christ's ascension in Anglo Saxon literature offering the only comprehensive examination of how patristic ascension theology is transmitted adapted and taught to Anglo Saxon audiences This book argues that Anglo Saxon authors recognise the Ascension as fundamentally liminal in nature as concerned with crossing boundaries and inhabiting dual states In their teaching authors convert abstract theology into concrete motifs reflecting this liminality such as the gates of heaven and Christ's footprints By examining a range of liminal imagery Between earth and heaven demonstrates the consistent sophistication and unity of Ascension theology in such diverse sources as Latin and Old English homilies religious poetry liturgical practices and lay popular beliefs and rituals This study not only refines our evaluation of Anglo Saxon authors knowledge of patristic theology and their process of source adaptation but also offers a new understanding of the methods of religious instruction and uses of religious texts in Anglo Saxon England capturing their lived significance to contemporary audiences

Multiple Perspectives on English Philology and History of Linguistics Shōichi Watanabe, Tetsuji Oda, Hiroyuki Eto, 2010 This collection of articles covers a wide range of topics in English philology and history of linguistics The volume proceeds from Old English studies offering a unique perspective and approach in literary and linguistic research into Anglo Saxon England Two articles deal with English phonology from both historical and contemporary standpoints and another with a theoretical discussion of etymological inquiry The last section contains three articles focusing on the history of linguistics or the history of ideas The wide range of topics addressed in the 12 chapters of this volume reflects the diversity of interests in the research efforts of Shoichi Watanabe professor emeritus at Sophia University to whom this volume is dedicated by his former students He is not only highly valued as a distinguished professor of English philology but also acknowledged for his critique of civilization with his unique view of history and culture

Literacy and Identity in Early Medieval Ireland Elva Johnston, 2013-08-15 Much of our knowledge of early medieval Ireland comes from a rich literature written in a variety of genres and in two languages Irish and Latin Who wrote this literature and what role did they play within society What did the introduction and expansion of literacy mean in a culture

where the vast majority of the population continued to be non literate How did literacy operate in and intersect with the oral world Was literacy a key element in the formation and articulation of communal and elite senses of identity This book addresses these issues in the first full inter disciplinary examination of the Irish literate elite and their social contexts between ca 400 1000 AD It considers the role played by Hiberno Latin authors the expansion of vernacular literacy and the key place of monasteries within the literate landscape Also examined are the crucial intersections between literacy and orality which underpin the importance played by the literate elite in giving voice to aristocratic and communal identities
