Semantics and Lexicography Herbert Ernst Wiegand, 2011-05-02 This volume is a compilation of nine articles translated from German They deal with those lexicographic texts or text excerpts which have been formulated in order to convey the meaning of a lexical unit to a potential dictionary user who is not familiar with that meaning The articles not only critically analyze lexicographic practice in particular the so called lexicographic definitions and the items giving the synonyms in correlation with the examples in the light of different semantic approaches They also present ways towards a common understanding in the context of lexicographically imparting knowledge of meaning i e on the basis of an actional semantics approach which takes into account results obtained from analyses of everyday dialogs about word meanings Moreover they discuss how meaning conveying texts can serve their purposes in dictionary look up situations and they lay out all those aspects which are particularly to be taken into consideration in the formulation of lexicographic texts aimed at conveying meaning in dictionaries belonging to different types

Lexicography, Terminology, and Translation Lynne Bowker, 2006-09-28 This volume in honour of Ingrid Meyer is a tribute to her work in the interrelated fields of lexicography terminology and translation One key thing shared by these fields is that they all deal with text Accordingly the essays in this collection are

united by the fact that they too are all text based in some way In the majority of essays electronic corpora serve as the textual basis for investigations Chapters focusing on electronic corpora include a description of a tool that can be used to help build specialized corpora in a semi automatic fashion corpus based investigations of terminological knowledge patterns terminological implantation lexicographic information and translation solutions comparisons of corpora to conventional resources such as dictionaries and analyses of corpus processing tools such as translation memory systems In several essays notably those dealing with historical or literary documents the texts in question are specific manuscripts that have been studied with a view to learning more about lexicographic and translation practice The volume is rounded out with a chapter on audiovisual translation that takes a non conventional view of text where text includes film Published in English

Manual of Specialised Lexicography Henning Bergenholtz, Sven Tarp, 1995-07-14 From 1990 1994 the Danish Research Council for the Humanities granted a research project entitled translation of LSP texts which was initially split up into five part projects one of which has been concerned with LSP lexicography The Manual of Specialised Lexicography is one of the results of the research undertaken by this project The primary purpose of the Manual is to contribute towards an improved basis for practical specialised lexicography which has so far had but a small share in the explosive development that has taken place in general language lexicography since the early 1970s One implication of this is that only to a limited extent has it been possible to build upon existing findings The Manual thus has the twofold aim of offering guidance and direction to authors of specialised dictionaries as well as contributing towards the further development of lexicographical theories

Studies on Multilingual Lexicography María José Domínguez Vázquez,Mónica Mirazo Balsa,Carlos Valcárcel Riveiro,2019-12-16 Given the new technological advances and their influence and imprint in the design and development of dictionaries and lexicographic resources it seems important to put together a series of publications that address this new

situation dealing in particular with multilingual and electronic lexicography in an increasingly digital multilingual and multicultural society This is the main objective of this volume which is structured in two central aspects In the first of them the concept of multilingual lexicography is discussed in regard to the influence that the Internet and the application of digital technologies have exercised and continue to exercise both in the conception and design of dictionaries and new lexicographic application tools as well as the emergence of new types of users and forms of consultation The role of the dictionary must necessarily be related to social development and changes In the second thematic section different dictionaries and resources that focus on a multilingual and electronic approach to the linguistic data for their lexicographical treatment and consultation are presented

Life and Mortality in Ugaritic Matthew McAfee, 2019-06-07 While topics such as death funerary cult and the netherworld have received considerable scholarly attention in the context of the Ugaritic textual corpus the related concept of life has been relatively neglected Life and Mortality in Ugaritic takes as its premise that one cannot grasp the significance of mwt to die without first having wrestled with the concept of yy to live In this book Matthew McAfee takes a lexical approach to the study of life and death in the Ugaritic textual corpus He identifies and analyzes the Ugaritic terms most commonly used to talk about life and mortality in order to construct a more representative framework of the ancient perspective on these topics and he concludes by synthesizing the results of this lexical study into a broader literary discussion that considers among other things the implications for our understanding of the first millennium Katumuwa stele from Zincirli McAfee's study complements previous scholarly work in this area which has tended to rely on conceptual and theoretical treatment of mortality and advances the discussion by providing a more focused lexical analysis of the Ugaritic terms in question It will be of interest to Semitic scholars and those who study Ugaritic in particular in addition to students of the culture of the ancient Levant
