Studies In Foundational Philosophy:

Hegel Reconsidered H. Tristram Engelhardt Jr., T. Pinkard, 2013-03-09 Much of contemporary philosophy political theory and social thought has been shaped directly or indirectly by Georg Wilhelm Friedrich Hegel though there is considerable disagreement about how his work should be understood He has been described both as a metaphysician and characterized as an ironic narrator who anticipated the character of philosophy after metaphysics His position is equally ambiguous with regard to his political thought He has been construed both as an enemy of the liberal state and as a friend of freedom This volume's revisionist reassessment building on the scholarship of Klaus Hartmann explores these ambiguities in favor of a non-metaphysical reading of Hegel's arguments It also shows how the foundations of his political thought support a liberal democratic state This reappraisal of Hegel's arguments resituates him as a philosopher who anticipates the difficulties of post-modernity and offers a basis for reassessing ontology aesthetics and revolution Philosophers and those doing work in political theory will find this volume of great interest

The Transcendental Turn Sebastian Gardner, Matthew Grist, 2015-02-19 Kant's influence on the history of philosophy is vast and protean The transcendental turn denotes one of its most important forms defined by the notion that Kant's deepest insight should not be identified with any specific epistemological or metaphysical doctrine but rather concerns the fundamental standpoint and terms of reference of philosophical enquiry To take the transcendental turn is not to endorse any of Kant's specific teachings but to accept that the Copernican revolution announced in the Preface of the Critique of Pure Reason sets philosophy on a new footing and constitutes the proper starting point of philosophical reflection The aim of this volume is to map the historical trajectory of transcendental philosophy and the major forms that it has taken The contributions from leading contemporary scholars focus on the question of what the transcendental turn consists in its motivation justification and implications and the limitations and problems which it arguably confronts with reference to the relevant major figures in modern philosophy including Kant Fichte Hegel Nietzsche Husserl Heidegger Merleau-Ponty and Wittgenstein Central themes and topics discussed include the distinction of realism from idealism the relation of transcendental to absolute idealism the question of how transcendental conclusions stand in relation to and whether they can be made compatible with naturalism the application of transcendental thought to foundational issues in ethics and the problematic relation of phenomenology to transcendental enquiry

Normativity and Phenomenology in Husserl and Heidegger Steven Crowell, 2013-04-25 Demonstrates how phenomenology constructively addresses problems in philosophy of mind moral psychology and philosophy of action

The Foundation of Reality David Glick, George Darby, Anna Marmodoro, 2020-04-29 Are space and time fundamental features of our world or might they emerge from something else The Foundation of Reality brings together metaphysicians and philosophers of physics working on space-time and fundamentality to address this timely question Recent developments in the interpretation of quantum mechanics and the understanding of certain approaches to quantum gravity have led

philosophers of physics to propose that space and time might be emergent rather than fundamental But such discussions are often conducted without engagement with those working on fundamentality and related issues in contemporary metaphysics This book aims to correct this oversight The diverse contributions to this volume address topics including the nature of fundamentality the relation of space and time to quantum entanglement and space and time in theories of quantum gravity Only through consideration of a range of different approaches to the topic can we hope to get clear on the status of space and time in our contemporary understanding of physical reality Philosophical and Theological Papers, 1965-1980 Bernard J. F. Lonergan, 2004-01-01 This anthology contains Lonergan's lectures on philosophy and theology given during the later period of his life 1965-1980 and document his development in the discipline during the years leading up to the publication of *Method in Theology* and beyond to 1980 **Philosophical and Theological Papers, 1965-1980** Bernard Lonergan, 2004-06-02 A companion to *Philosophical and Theological Papers* 1958-1964 Volume 6 in the *Collected Works of Bernard Lonergan* series this anthology contains Lonergan's lectures on philosophy and theology given during the later period of his life 1965-1980 These papers document his development in the discipline during the years leading up to the publication of *Method in Theology* and beyond to 1980 when he was more engaged in his writings and seminars on macroeconomics *Philosophical and Theological Papers* 1965-1980 is divided into five sections forming units on the basis of dates The three central sections are each a set of lectures respectively given at the Massachusetts Institute of Technology Gonzaga University in Spokane and Trinity College University of Toronto Although there is some repetition amongst the lecture sets and in relation to other more familiar works this repetition displays occasional new turns of phrase that the careful reader will note In at least one instance familiar material suddenly opens out onto expressions not to be found anywhere else in Lonergan's work Other very interesting developments regard the movement from speaking of the immutability of dogmas to their permanence of meaning and the permutations among real self transcendence performative self transcendence and moral self transcendence Economy Studies Sam Muijnck, Joris Tieleman, 2025-10-01 The *Economy Studies* project emerged from the worldwide movement to modernise economics education spurred on by the global financial crisis of 2008 the climate crisis and the COVID-19 pandemic It envisions a wide variety of economics graduates and specialists equipped with a broad toolkit enabling them to collectively understand and help tackle the issues the world faces today This is a practical guide for re-designing economics courses and programs Based on a clear conceptual framework and ten flexible building blocks this handbook offers refreshing ideas and practical suggestions to stimulate student engagement and critical thinking across a wide range of courses Key features are Adapting Existing Courses Plug and play suggestions to improve existing economics courses with attention to institutions history values and practical skills Teaching materials A guide through the rapidly growing range of innovative textbooks and other teaching materials Example Courses and Curricula How to design pluralist real world economics education within the practical limits of time and resources The
