Studies in Jaimini Astrology Bangalore V. Raman, 2003-10-15 Contents **Studies in Jaimini Astrology** Bangalore Venkat Raman, 1986 *Jaimini System : An Introduction* Shalini Dasmana, This book deals with the fundamentals of Jaimini Astrology Second to PARASHAR JAIMINI is the greatest giant of Vedic Astrology Parashar laid down the great principle of Vedic Astrology while Jaimini went a step further and refined them JAIMINI UPDESH SUTRAS were composed by Maharishi Jaimini SUTRAS are very short sanskrit Stanzas with very vast and profound meaning They are like a ball of thread The more they are opened out the more meaning they reveal and they are so brief that they can even be memorised Who was Jaimini Maharishi No one knows for sure Some learned men think that he was a disciple of the famous Maharishi Ved Vyas who was Parashar s Son They also feel that he is the famous author of Poorva Mimansa and Jaimini Bharat Others feel that he is a later author who was very familiar with mantras Whoever he was His genius is reflected in the sutras he composed These sutras are probably five thousand years old They have stood the test of time and time has turned them into beautiful Gems of prediction The centuries have proved their authenticity and soundness These sutras are 936 in number spread over four Adhyayas The Greatest principle of Jaimini System is that the Study of Lagna is not enough Apart from studying the horoscope from the regular Lagna Moon and Sun one must study it in the light of karakamsa Lagna Arudha Up pada Hora lagna and the different karakas In this way the personality of the Jatak is split up into its fundamentals and studied Next is the karakatvas of the planets and houses Parashar allotted permanent karakatvas to planets and houses He also gave conditional karakatvas to the planets according to their lordship over different houses Jaimini made prediction simpler sharper and quicker by establishing limits of these karakatvas through the different char karakas Another striking feature Jaimini is the Jaimini Drishti or Aspects Every student of Astrology knows that both planets and Rashis affect us and yet we consider the aspects of only the planets What about the Rashis This factor was taken into account by Jaimini He established that the rashis also aspected each other and the planets placed in them also cast their Aspects along with their respective rashis These aspects are quite different from Parashari aspects Apart from these main features Jaimini has its own Yogas Argalas and dashas The most popular dasha for General use is Char dasha Some of the other dashas as are Sthir dasha Mandook dasha Trikona dasha Nirayan shoola dasha Brahma dasha Varnada dasha and Yogardha dasha Some of them are conditional dashas while the others are used for a specific purpose We shall be confining ourselves to Char dasha only in this book On the face of it it may appear that Jaimini contradicts Parashar This is a misconception If studied in depth it becomes clear that Jaimini is only a refinement of Parashari principles Traditional Astrologers mostly use Jaimini for Ayurdaya or assessment of longevity The time is ripe for us to make an effort to revive this great system so that it can be used for the entire reading of the horoscope and for bringing fineness or sookshmata in prediction The main purpose behind introducing Jaimini Astrology is to encourage the use of composite techniques of prediction These have been adopted superbly by shri

Mahadeva pathak in his Jatak Tatva He has used Jaimini principles alongside the Parashari principles to produce very good composite Techniques In the end I would like to point out that most of the Astrological classics stress more on Negativity As modern Astrologers we need to conduct researches to bring out the positive aspects of these principles and to modify and update them Jaiminisutras Bangalore Suryanarain Rao,B. V. Raman,2011-01-01 Jaimini is held in very great esteem throughout India not only for his philosophical aphorisms but for his astrological writings also Jaiminisutras as presented in these pages deals with a system of astrology that has no parallel in the existing methods The profundity and brevity of these sutras comprehend a vast amount of knowledge in the shortest forms possible In the end the author remarks that all that he has written is quite true as these truths have been propounded by the still earlier Maharshis Pitamaha or Brahma Vyasa Parasara Vasistha Garga Bhrgu Surya Chandra Brihaspati Sukra Marichi Palaha Pulisa Maya and other eminent scientists The treatment of the different Bhavas Rasis and Planets will be found a little confusing in the beginning but with some patience diligence and practice the peculiarities of his system readily yield themselves to our comprehension He gives various Lagnas Hora Lagna Ghatika Lagna Upapada Lagna Varnada Lagna and so forth His Dasas are mostly founded on Rasis and Navamsas Brahma Rudra and Mahesvara Dasas are peculiar in these sutras It is asserted by some that Jaiminisutras extend over eight adhyayas However here only two chapters in four parts each have been explained The masterly way in which the Maharshi has explained the Astrological principles will surely make the students masters in this line **Hindu Predictive Astrology** B.
