Studies Voltaire 18th Century Volume 231:

The Roland Legend in Nineteenth Century French Literature Harry Redman Jr., 2014-07-15 The year was 778 Charlemagne starting homeward after an expedition onto the Iberian Peninsula left his nephew Count Roland in command of a rear guard As Roland and his troops moved through the Pyrenees a fierce enemy swooped down and annihilated them Whether the attackers were Moors Basques Gascons or Aquitainians is still disputed The massacre soon passed into legend preserved but at the same time expanded and interpreted in oral tradition and written accounts Dormant after the late Middle Ages the legend began to inspire literary works even before the discovery and publication of the Oxford manuscript *Chanson de Roland* in 1837 The French Revolution and Empire temporarily relieving Roland of his religious aura hailed him as a patriot belaboring his country's foes The Romantics made him either a dauntless irrepressible extrovert or a noble victim struck down while making the world a better place As the twentieth century dawned a few authors scoffed at hero worship but others held up Roland as a heroic example that might help his countrymen live with the humiliation of their defeat in the Franco Prussian War and then as World War I approached retake their lost territories Fascinating as the Roland legend is in itself no one has looked into the nonacademic French literature to which it has given rise in modern times Harry Redman now shows how writers with varying outlooks and approaches and divergent purposes drew upon the legend from 1777 to the end of World War I A monumental enterprise based on primary research the book is of extraordinary value to scholars interested in the Old French epic and to all those concerned with more recent literary periods

Art and Religion in Eighteenth-Century Europe Nigel Aston, 2009-07-15 Eighteenth century Europe witnessed monumental upheavals in both the Catholic and Protestant faiths and the repercussions rippled down to the churches religious art forms Nigel Aston now chronicles here the intertwining of cultural and institutional turmoil during this pivotal century The sustained popularity of religious art in the face of competition from increasingly prevalent secular artworks lies at the heart of this study Religious art staked out new spaces of display in state institutions palaces and private collections the book shows as well as taking advantage of patronage from monarchs such as Louis XIV and George III who funded religious art in an effort to enhance their monarchical prestige Aston also explores the motivations and exhibition practices of private collectors and analyzes changing Catholic and Protestant attitudes toward art The book also examines purchases made by corporate patrons such as charity hospitals and religious confraternities and considers what this reveals about the changing religiosity of the era as well An in depth historical study *Art and Religion in Eighteenth Century Europe* will be essential for art history and religious studies scholars alike

Human Nature, Cultural Diversity, and the French Enlightenment Henry Vyverberg, 1989-08-17 In this work Henry Vyverberg traces the evolution and consequences of a crucial idea in French Enlightenment thought the idea of human nature Human nature was commonly seen as a broadly universal unchanging entity though perhaps modifiable by geographical social and historical factors Enlightenment empiricism suggested a degree

of cultural diversity that has often been underestimated in studies of the age. Evidence here is drawn from Diderot's celebrated Encyclopedia and from a vast range of writing by such Enlightenment notables as Voltaire, Rousseau and d'Holbach. Vyverberg explains not only the age's undoubted fascination with uniformity in human nature but also its acknowledgment of significant limitations on that uniformity. He shows that although the Enlightenment's historical sense was often blinkered by its notions of a uniform human nature, there were also cracks in this concept that developed during the Enlightenment itself.

Ancient Astronomical Observations and the Study of the Moon's Motion (1691-1757) John M. Steele, 2012-02-17 The discovery of a gradual acceleration in the moon's mean motion by Edmond Halley in the last decade of the seventeenth century led to a revival of interest in reports of astronomical observations from antiquity. These observations provided the only means to study the moon's secular acceleration as this newly discovered acceleration became known. This book contains the first detailed study of the use of ancient and medieval astronomical observations in order to investigate the moon's secular acceleration from its discovery by Halley to the establishment of the magnitude of the acceleration by Richard Dunthorne, Tobias Mayer and Jérôme Lalande in the 1740s and 1750s. Making extensive use of previously unstudied manuscripts, this work shows how different astronomers used the same small body of preserved ancient observations in different ways in their work on the secular acceleration. In addition, this work looks at the wider context of the study of the moon's secular acceleration, including its use in debates of biblical chronology, whether the heavens were made up of ether and the use of astronomy in determining geographical longitude. It also discusses wider issues of the perceptions and knowledge of ancient and medieval astronomy in the early modern period. This book will be of interest to historians of astronomy, astronomers and historians of the ancient world.

The Seven Years' War, 2012-11-09 In *The Seven Years War: Global Views*, Mark H. Danley, Patrick J. Speelman and sixteen other contributors reach beyond traditional approaches to illuminate the conflict as world war. An introduction addresses the challenges of discretely defining the war. Chapters examine theaters such as the Carnatic, Bengal, the Philippines, Portugal, Senegal, and the Caribbean. Other chapters treat understudied topics such as the Anglo-Cherokee campaigns, Sweden's participation, Ottoman neutrality, the Vatican, European perceptions of Cossacks and Kalmyks, the Enlightenment and the war, the choosing of sides in Europe and North America, social and political aspects of French and British military life, operational reconnaissance, and the war's complex ending in western Germany. A conclusion situates the war as a marker of modernity. Contributors are in order of appearance: Jürgen Luh, Armstrong Starkey, Matthew C. Ward, G. J. Bryant, Johannes Burkhardt, Gunnar Aselius, Virginia H. Aksan, Julia Osman, Ewa Anklam, Brian Fuessel, James Searing, Richard Harding, John Oliphant, Mark H. Danley, Patrick J.
