Kenneth L. Taylor

Studies Voltaire 18th Century Volume 240:

The Earth Sciences in the Enlightenment Kenneth L. Taylor, 2024-10-28 This volume is concerned with the geological sciences in the 18th century with special emphasis on France and French scientists A first focus is on the pioneering geologist Nicolas Desmarest whose investigations in Auvergne and Italy among other places had important consequences in geological theory and practice Desmarest emerges as a figure of intriguing complexity and refined methodological convictions defying facile interpretation in terms of for instance a simple polarity between vulcanism and neptunism Widening his inquiry beyond Desmarest Professor Taylor also endeavors to recover key elements of the presuppositions and thought patterns of Enlightenment geologists and to discern how geological investigation worked during this formative period In the era that modern geological science was beginning to take form many of the participants are seen as struggling to define their scientific objectives and procedures by drawing from the competing frameworks of physique or natural philosophy descriptive natural history and antiquarian scholarship or developmental history One of the articles Reflections on Natural Laws in Eighteenth Century Geology appears here for the first time in English Enlightenment and Secularism Christopher Nadon, 2013-04-18 Enlightenment and Secularism is a collection of twenty eight essays that seek to understand the connection between the European Enlightenment and the emergence of secular societies as well as the character or nature of those societies The contributors are drawn from a variety of disciplines including History Sociology Political Science and Literature Most of the essays focus on a single text from the Enlightenment borrowing or secularizing the format of a sermon on a text and are designed to be of particular use to those teaching and studying the history of the Enlightenment within a liberal arts curriculum **Threads and Traces** Carlo Ginzburg, 2012-01-09 Carlo Ginzburg's brilliant and timely new essay collection takes a bold stand against naive positivism and allegedly sophisticated neo skepticism It looks deeply into questions raised by decades of post structuralism What constitutes historical truth How do we draw a boundary between truth and fiction What is the relationship between history and memory How do we grapple with the historical conventions that inform in different ways all written documents In his answers Ginzburg peels away layers of subsequent readings and interpretations that envelop every text to make a larger argument about history and fiction Interwoven with compelling autobiographical references *Threads and Traces* bears moving witness to Ginzburg's life as a European Jew the abiding strength of his scholarship and his deep engagement with the historian's craft Geometry and Monadology Vincenzo de Risi, 2007-08-08 This book reconstructs from both historical and theoretical points of view Leibniz's geometrical studies focusing in particular on the research Leibniz carried out in his final years The work's main purpose is to offer a better understanding of the philosophy of space and in general of the mature Leibnizean metaphysics This is the first ever comprehensive historical reconstruction of Leibniz's geometry *The Political Thought of Anacharsis Cloots* Frank Ejby Poulsen, 2023-11-06 Historians have often either ignored Anacharsis Cloots 1755-1794 or considered him deranged

because he claimed to be the orator of the human race and devised a universal republic based on the sovereignty of the human race This book is the first comprehensive study of the entire body of Cloodt's written works and political actions By contextualizing them the book not only rehabilitates Cloodt as a political thinker worthy of consideration but also argues that his political thought constitutes a specific branch of republicanism in the age of Atlantic revolutions cosmopolitan republicanism The introduction suggests how 18th century French cosmopolitanism was a new philosophical tradition but was composed of several themes which the book then analyses in Cloodt's writings The first chapter provides a brief overview of his life The second chapter explains why he called himself orator and wrote pamphlets and why contemporary readers should not discard this as non philosophical Having established Cloodt's writings as constituting a philosophical system the following chapters explore it through the themes laid out in the introduction First the concept of reason and his understanding of science Second the paradigm of natural law and the role of nature in moral and political thought Third the conception of humanity and individuals in nature and society Finally republicanism and its principles The last chapter summarizes the elements of Cloodt's cosmopolitan republicanism and opens a research programme to other political thinkers in the age of Atlantic revolutions for historians and political theorists *Seek Knowledge* Ian Richard Netton, 2013-01-11

Explores various facets of the Islamic search for knowledge with essays on aspects of Thought or Travel **Inventing Human Rights** Lynn Hunt, 2008-03-25 In this extraordinary work of cultural and intellectual history Professor Hunt grounds the creation of human rights in the changes that authors brought to literature the rejection of torture as a means of finding out truth and the spread of empathy over the centuries Impunity and Capitalism Trevor Jackson, 2022-09-15 Whose fault are financial crises and who is responsible for stopping them or repairing the damage Impunity and Capitalism develops a new approach to the history of capitalism and inequality by using the concept of impunity to show how financial crises stopped being crimes and became natural disasters Trevor Jackson examines the legal regulation of capital markets in a period of unprecedented expansion in the complexity of finance ranging from the bankruptcy of Europe's richest man in 1709 to the world's first stock market crash in 1720 to the first Latin American debt crisis in 1825 He shows how after each crisis popular anger and improvised policy responses resulted in efforts to create a more just financial capitalism but succeeded only in changing who could act with impunity and how Henceforth financial crises came to seem normal and legitimate caused by impersonal international markets with the costs borne by domestic populations and nobody in particular at fault

The Sceptical Mode in Modern Philosophy R. A. Watson, J.E.
