The Moon Bill Leatherbarrow, 2018-05-15 The moon has always been the most obvious feature in our night sky It is our nearest celestial neighbour orbiting the earth at an average distance of 384 400 kilometers and is large enough to display significant detail even to the unaided eye Our moon has drawn observers since the dawn of humankind and all people have tried to make sense of the puzzles it poses and the questions it raises The moon provided our ancient ancestors with one of the earliest means of keeping and measuring time and many early religions had cults that worshipped it When it eclipses the sun it provides one of the most awe inspiring views in nature In *The Moon* celebrated amateur astronomer Bill Leatherbarrow provides expert insight into the history of our study of this compelling astronomical body Drawing on his own decades of lunar observation he describes how and why the observation and study of the moon has evolved particularly in the age of telescopic study He also offers an overview of current scientific thinking and developments in lunar science since the advent of the Space Age even providing practical advice on how to make your own observations of the moon Extensively illustrated with images of the lunar surface taken both from spacecraft and using amateur equipment this book is an accessible introduction to complex astrophysical concepts that will give all amateur astronomers and anyone fascinated by this natural satellite something to moon over

Messages from the Moon Sven Grampp, 2024-08-02 In this anthology a journey around the world and through time is undertaken in 21 countries on no less than six continents In this way the global reception of one of the biggest media events to date is given contour Based on the coverage of the first manned moon landing the global history of the Cold War at the time of the Space Race can be told in its many different local facets as well as in its worldwide interconnectedness Against the backdrop of current efforts by various countries to return to the moon or even to establish a space army as well as in view of the extremely tense geopolitical situation which is already being invoked in many places as Cold War 2 0 such a global look back to the time of Cold War 1 0 certainly seems relevant in order to better understand the present and near future of political media cultures
