

Chapter 1 Study Guide

Note

This Study Guide will help you prepare for the exam but, it is not a one-to-one mapping of the questions you will find there. For example, some exam questions may ask you to synthesize information across different sections of the chapter or be able to analyze information you are given. Use the Study Guide questions to determine what is most important in each chapter. If you are conscientious in your answers, it can help you more than re-reading the textbook chapter itself.

Instructions

Answer the following questions fully:

1. What does NAMI stress in its definition of mental illness? What does the BPS stress instead?

Answer: The NAMI stresses that mental illnesses are *medical* conditions. BPI stresses the abnormality of mental illnesses, but they focus on cause problems when overclassify mental illnesses as medical.

2. How is mental illness defined? How do conflicting definitions of mental illness inform the idea that contrasting perspectives are common in abnormal psychology?

Answer: Mental illness is defined as medical conditions that disrupt an individual's way of thinking, feeling, mood, and daily functioning. Because there are conflicting and contradicting sides regarding if mental illness is a medical condition or not, there will not be clear cut answers to all our questions. This makes it engaging for students because it pushes them to make their own educated opinions and dive deeper while studying.

3. Explain the difference between psychiatrists and psychologists.

Answer: Psychiatrists are physicians who have completed medical school and have had specialized training in psychiatry. Psychologists do not have a medical degree, their degree studies mental processes and behavior. They can provide therapy with the right degree.

4. Define psychopathology, mental illness/mental disorder, harmful internal dysfunction, deviance, and social oppression.

Study Guide Ch 1 12
