R. Bowker LLC, 1979-05 Self, Ego, and Identity Daniel K. Lapsley, F. Clark Power, 2012-12-06 In the midst of the cognitive revolution there has been a veritable explosion of interest in topics that have been long banished from academic consideration under the intellectual hegemony of behaviorism Most notably notions of self ego and identity are reasserting themselves as fundamental problems in a variety of research traditions within psychology and the social sciences Theoretical models review articles edited volumes and empirical work devoted to these constructs are proliferating at a dizzying rate This clearly attests to the renascent interest in these topics the vitality of these research paradigms and the promise that these constructs hold for explaining fundamental aspects of human development and behavior Although the renewed academic interest in self ego and identity is obviously an exciting and healthy development there is always the tendency for research to take on a parochial character When boundaries are erected among different theoretical perspectives when empirical findings are viewed in isolation when theories are too sharply delimited and segregated from other domains of behavior then what may seem like progressive healthy and content increasing tendencies in a research paradigm may turn out to be on closer inspection merely an inchoate thrashing about Fortunately there is an internal dynamic to scientific investigation that tends to combat this degenerating tendency There is something about the rhythm of science that bids us to transcend parochial theoretical interests and seek the most general theory **The Developing Person Through the Life Span** Kathleen Stassen Berger, 2005 The Developing Person Through the Life Span Sixth Edition presents theory research practical examples and policy issues in a way that inspires students to think about human development and about the individual's role in the community and the world Review the new edition and

you ll find Berger s signature strengths on display the perceptive analysis of current research the lively and personal writing style and the unmistakable commitment to students You ll also find a wealth of new topics plus a video based Media Tool Kit that takes the teaching and learning of human development to a new level
