

Tools and Appliances for Constructing Louden Standardized Mangers

Fig. 970

Fig. 970 represents the Louden Cut-Out Form to make the cut-outs in the Louden High Built-Up Manger Curb. The forms are set in between the boards used in constructing the curb where the stanchions are to be anchored. No cutting of the boards nor extra work of any kind is required to make the cut-outs and they will all be uniform in size and shape. The anchors which connect the stanchions to the curb are easily attached to the forms and the cement being slushed around them will make a better bond than if they were set afterwards. The cut shows one of our large standardized U bolt anchors connected to the form. There should be 4 to 6 forms for each installment according to the size of the barn and the speed required in doing the work.

Fig. 1074

Fig. 1074 is a top view of our Curb Gauge, by means of which the form-boards for the curb will be held the proper distance apart, and equal distances from the stall posts. No measuring or cutting of boards is required. There should be 8 to 12 gauges for each installment.

Fig. 1013

(Patent Pending)

Fig. 1013 is a perspective of one of the Louden Manger Templets. There are seven different sizes—one for each of the concrete mangers and one for each of the bottoms of two sizes of galvanized mangers. No other device has ever been made that will begin to compare with these templets for ease and rapidity in the construction of cement mangers as well as for the excellence of the work.

There should be 5 to 8 templets for each installment.
