The Foreign Investment Debate:

The Foreign Investment Debate Cynthia A. Beltz, 1995 Traditionally the United States has maintained an open door at home while promoting investment liberalization abroad through the negotiation of bilateral and regional treaties This strategy has paid off by boosting productivity and economic welfare at home while developing countries are moving at an unprecedented rate to emulate the successful open door policies of the United States There is also renewed interest in a multilateral set of rules for investment At the same time a new generation of U S laws and proposed regulations challenges the very foundation of America s open door namely the principles of national treatment and nondiscrimination This volume brings both sides of the debate together to examine the changing economic role of foreign investment the policy trends and the tools for reducing barriers to transnational investors The result is a provocative and informative discussion of the strategies and trade offs shaping the foreign investment debate *The International Law on Foreign Investment* M. Sornarajah, 2021-07-01 The climate surrounding foreign investment law is one of controversy and change and with implications for human rights and environmental protection foreign investment law has gained widespread public attention and visibility This fully updated edition of Sornarajah s classic text offers thought provoking analysis of the law in historical political and economic contexts capturing leading trends and charting the possible course of future developments It takes into account the newer types of treaties that establish a regulatory space for states and moves away from inflexible investment protection exploring the newly created defences relating to environment human rights indigenous rights and other areas ending the fragmentation of the law It looks at the current debates on legitimacy of the system and current efforts at reform Suitable for postgraduate and undergraduate students *The International Law on Foreign Investment* is essential reading for anyone specialising in the law of foreign investments **Foreign Investment Under the Comprehensive Economic and Trade Agreement (CETA)** Makane Moïse Mbengue, Stefanie Schacherer, 2018-12-07 This book analyzes the investment chapter of a new type of trade agreement between Canada and the European Union to help readers gain a better understanding of this mega regional deal which includes foreign investment protection It first provides background information on the Comprehensive Economic and Trade Agreement CETA particularly focusing on the chapter on foreign investment including the rules on the entry of investments their protection and the stringent dispute settlement mechanism It goes on to explore whether these provisions are a further step toward reforming the current international investment law regime It also examines the highly innovative part of the agreement the inclusion of crosscutting issues such as sustainable development In addition it examines the CETA investment chapter from the perspective of non contracting parties including Africa Asia and Latin America The book is of interest to academics and students in the field of international investment law It is also an essential resource for government legal advisers policymakers business practitioners and others dealing with international investment law The treatment and taxation of foreign investment under international law Fiona

Foreign Direct Investment and International Law Adaeze Agatha Aniodoh,2025-07-16 This book examines the regulatory framework for foreign direct investments most notably the bilateral investment treaties which provide several guarantees that minimise the exposure of risks to foreign investors in a host State Most States have recognised that one of the ways they can improve their economic growth is by providing effective mechanisms for the attraction of foreign investments In this regard foreign direct investments have become a key element in the strategic vision for advancing any national economy The book examines guarantees which have the capacity to impinge on the economic sovereignty of a State raising questions such as are host States obliged to comply with the rights of foreign investors to free capital repatriation in the face of economic difficulties What power does a host State have to regulate and impose capital controls that are deleterious to the rights of a foreign investor This book argues that policies aimed at increasing foreign direct investment need to extend beyond investment liberalisation to strike a balance between the regulatory rights of a

State and the legitimate expectations of foreign investors Advancing the discussion on the necessity of balancing the needs of foreign investors with those of the host community and exploring the power asymmetry present in treaty negotiations this book will be of interest to students academics and practitioners with an interest in international investment law
