John C. Hsu, 1989 Recent events in China have revealed a nation struggling to reconcile its new thinking with its traditional institutions and practices This book provides an assessment of one aspect of the reform process the foreign trade system The reforms in China have heralded a new openness in Chinese economic policy In this book his first full length work on the subject Dr Hsu investigates the impact of the reforms on China s foreign trade and consequently on the domestic economy In the process he examines such issues as the role of foreign trade in China s economic development the institutional changes involved in the foreign trade reforms and the efficiency of the new foreign trade incentive system He then evaluates the possibilities for further foreign trade reforms in the future In conclusion Dr Hsu suggests that Chinese enterprises have been slow to respond to changes in domestic and international market conditions and that exposure to foreign markets has exacerbated inflation problems in the Chinese economy As a result he finds that China has not enjoyed the full potential benefits of its reform program This book will be of interest to economists political scientists Asian studies specialists and others interested in the economic ramifications of China s reform process It is a timely and thorough account of this crucial aspect of reform and an important addition to the growing body of literature on the restructuring of modern communist states
