Morality N. Z. Chavchavadze,N. V. Chavchavadze,Gia Nodia,Paul Peachey,1994 Dictionary Of Modern American Philosophers John R. Shook,2005-05-15 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought **Exposing the Roots of Constructivism** R. Scott Smith,2022-10-20

Constructivism dominates over other theories of knowledge in much of western academia especially the humanities and social sciences In Exposing the Roots of Constructivism Nominalism and the Ontology of Knowledge R Scott Smith argues that constructivism is linked to the embrace of nominalism the theory that everything is particular and located in space and time Indeed nominalism is sufficient for a view to be constructivist However the natural sciences still enjoy great prestige from the fact value split They are often perceived as giving us knowledge of the facts of reality and not merely our constructs In contrast ethics and religion which also have been greatly influenced by nominalism usually are perceived as giving us just our constructs and opinions Yet even the natural sciences have embraced nominalism and Smith shows that this will undermine knowledge in those disciplines as well Indeed the author demonstrates that at best nominalism leaves us with only interpretations but at worst it undermines all knowledge whatsoever However there are many clear examples of knowledge we do have in the many different disciplines and therefore those must be due to a different ontology of properties Thus nominalism should be rejected In its place the author defends a kind of Platonic realism about properties Handbook of Archaeological Theories R. Alexander Bentley,Herbert D. G. Maschner,Christopher Chippindale,2009-09-16 This handbook

a companion to the authoritative Handbook of Archaeological Methods gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology *Athenaeum and Literary Chronicle* James Silk Buckingham, John Sterling, Frederick Denison Maurice, Henry Stebbing, Charles Wentworth Dilke, Thomas Kibble Hervey, William Hepworth Dixon, Norman Maccoll, Vernon Horace Rendall, John Middleton Murry, 1860 **Haldeman-Julius Quarterly** ,1927 **Book Reviews** ,1900 *Human Factual Knowledge* Mark Levensky, 1971 This flexible new series provides the only introductory material organized around such a well defined issues as What conditions justify exceptions to moral principles What are the possibilities of belief in God being rational Each volume contains eight to ten selections averaging between fifteen and twenty pages and an introduction which gives a clear statement of the problem points out a variety of possible approaches and locates each reading in the structure the editor has erected The readings are both classical and contemporary and all directly relate to each other one criticizing and advancing alternatives to the other Selections were chosen because of their merit and comprehensibility The series therefore includes a volume devoted to questions about justice and equality several volumes on substantive moral issues rather than meta ethical questions and a volume that treats many different approaches to the evaluation of religious beliefs contemporary as well as classical Publisher
