**Playing Hard at Life** Etty Cohen, 2013-05-13 Playing Hard at Life brings contemporary relational thinking to bear on the psychodynamic treatment of a notably difficult group of young patients Working with New York City teenagers who have survived the wars of inner city life and Israeli teenage soldiers who have survived the wars of the Middle East author Etty Cohen documents the extraordinary challenges of forming a treatment alliance with these shattered youngsters of engaging them psychodynamically and of working toward a viable termination The result is not only a poignant record of courage and commitment on the part of patient and therapist alike but also a valuable extension of modern trauma theory to adolescence as a developmental stage with its own challenges and requirements The heart and strength of Cohen's book is her vivid documentation of hands on encounters with her adolescent patients seen both individually and in group Cohen makes plain that with young people so horrendously traumatized treatment assures a necessarily improvisational character And yet she argues even in the type of pragmatic encounters dictated by massive and repeated trauma contemporary relational theory provides a compass with which to navigate through the rocky shoals of the clinical work Again and again the reader is shocked by just how much happened to these adolescents astonished at how resilient they proved to be and finally moved by how much Cohen was able to accomplish with them Her relational approaches to these treatments teamed with her realization that work with multiply traumatized adolescents cannot be structured in the manner of conventional therapy makes this book an invaluable timely and deeply sobering contribution to the literature

*A Resident's Guide to Psychiatric Education* M. Thompson, 2012-12-06 This is the inaugural volume of the new series Critical Issues in Psychiatry An Educational Series for Residents and Clinicians It is an appropriate beginning for this book represents a milestone in the evolution of psychiatric education For the first time there will now be a single place where one can find a comprehensive collection of educational goals and objectives to define the broad spectrum of knowledge and skills essential for general and child psychiatry This collection does not represent the bias of a single educator or program Rather it consists of a consensually validated ranking of relative importance for each educational goal and objective as determined by a large and international sampling of ex

perienced psychiatric educators as well as an editorial board with some of the most distinguished names in psychiatric education. It is even possible to tell at a glance whether the ranked level of importance is the same or different within several national groups for example Canadians vs Americans. This book is intended for all students of psychiatry. It is particularly valuable to residents in training but equally so for experienced clinicians preparing for Board examination or simply attending to the process of continuing education and intellectual renewal. While it might well be used by an institution to delineate the dimensions of a training program in psychiatry, it is intended primarily for the self evaluation and self monitoring of one's growth as a psychiatrist.

***Adolescent and Young Adult Addiction***, 2012-09. This thought provoking book *Adolescent Young Adult Addiction: The Pathological Relationship to Intoxication and The Interpersonal Neurobiology Underpinnings* discusses the struggles of that the youth of today are faced with and puts forth that adolescent and young adult addicts are not addicted to marijuana, heroin, etc. The name of the drug is an illusion as they are hooked on a pathological relationship to intoxication. This book bridges the gap between the mental health and the addiction fields. This book helps the reader to understand that there is no separation between relationships, mind and brain, bio psycho social. The peak of intoxication is a release of neurotransmitters such as dopamine and often opiate endorphins. These regulatory systems are actually built, sustained, broken, and also repaired in attuned and mis attuned relationships. How is this so? How does it get repaired? How do we bring this awareness to the client, family, and offer the experience of attuned relationships? How do pressures of our left brain, solution focused, material chasing, on the go culture contribute to this problem? Adolescents and young adults are not supposed to ask for help as it is the role of the social systems to work together in a way that helps them recognize their drug use as a problem. After these systems have helped to lift the bottom and dislodge the addict's relationship to intoxication, then the work is on understanding and treating the underpinnings that drive addiction. If the underpinnings are not dealt with, then relapse and cross addictions will occur. Utilizing attuned relationships to rewrite the internal working model and sustain neurobiological regulatory systems is the

key for long term sobriety Jon Daily LSCW CADCI is an expert in the specialized field of adolescent and young adult addictive disorders and dual diagnosis Jon s wisdom on understanding and treating today s youth combined with his ability to conceptualize and translate interpersonal neurobiology in a straight forward applicable fashion is a real gift to the reader
