The French Colonial Myth And Constitution Making In The Fourth Republic:

The French Colonial Myth and Constitution-Making in the Fourth Republic Donald Bruce Marshall, 1969 The French Colonial Myth and Constitution-making in the Fourth Republic Donald Bruce Marshall, 1973 **Cold War and Decolonization in Guinea, 1946-1958** Elizabeth Schmidt, 2007 Winner of the African Politics Conference Group's Best Book Award In September 1958 Guinea claimed its independence rejecting a constitution that would have relegated it to junior partnership in the French Community In all the French empire Guinea was the only territory to vote No Orchestrating the No vote was the Guinean branch of the Rassemblement Démocratique Africain RDA an alliance of political parties with affiliates in French West and Equatorial Africa and the United Nations trusts of Togo and Cameroon Although Guinea's stance vis-à-vis the 1958 constitution has been recognized as unique until now the historical roots of this phenomenon have not been adequately explained Clearly written and free of jargon Cold War and Decolonization in Guinea argues that Guinea's vote for independence was the culmination of a decade long struggle between local militants and political leaders for control of the political agenda Since 1950 when RDA representatives in the French parliament severed their ties to the French Communist Party conservative elements had dominated the RDA In Guinea local cadres had opposed the break Victimized by the administration and sidelined by their own leaders they quietly rebuilt the party from the base Leftist militants their voices muted throughout most of the decade gained preeminence in 1958 when trade unionists students the party's women's and youth wings and other grassroots actors pushed the Guinean RDA to endorse a No vote Thus Guinea's rejection of the proposed constitution in favor of immediate independence was not an isolated aberration Rather it was the outcome of years of political mobilization by activists who despite Cold War repression ultimately pushed the Guinean RDA to the left The significance of this highly original book based on previously unexamined archival records and oral interviews with grassroots activists extends far beyond its primary subject In illuminating the Guinean case Elizabeth Schmidt helps us understand the dynamics of decolonization and its legacy for postindependence nation building in many parts of the developing world Examining Guinean history from the bottom up Schmidt considers local politics within the larger context of the Cold War making her book suitable for courses in African history and politics diplomatic history and Cold War history **The American Experience in World War II: Pearl Harbor in history and memory** Walter L. Hixson, 2003 World War II changed the face of the United States catapulting the country out of economic depression political isolation and social conservatism Ultimately the war was a major formative factor in the creation of modern America This unique twelve volume set provides comprehensive coverage of this transformation in its domestic policies diplomatic relations and military strategies as well as the changing cultural and social arenas The collection presents the history of the creation of a super power prior to during and after the war analyzing all major phases of the U.S. involvement making it a one stop resource that will be essential for all libraries supporting a history curriculum This volume is available on its own or as part of the twelve

Perspectives on Imperialism and Decolonization R.F. Holland, G. Rivzi, 2023-05-03 *Perspectives on Imperialism and Decolonization* 1984 is a key collection of essays that analyse from many sides the growth and demise of Western imperialism They examine imperial history the experience of imperialism and offer new thoughts on British decolonization

The State of Sovereignty Douglas Howland, Luise S. White, 2009 *The State of Sovereignty* examines how it came to pass that the nation state became the prevailing form of governance in the world today Spanning the 19th and 20th centuries and addressing colonization and decolonization around the globe these essays argue that sovereignty is a set of historically contingent practices and not something that accrues naturally to states The contributors explore the different ways in which sovereign political forms have been defined and have defined themselves placing recent debates about nations and national identity within a broader history of sovereignty territory and legality

To Be Free and French Lorelle Semley, 2017-07-10 *The Haitian Revolution* may have galvanized subjects of French empire in the Americas and Africa struggling to define freedom and Frenchness for themselves but Lorelle Semley reveals that this event was just one moment in a longer struggle of women and men of color for rights under the French colonial regime Through political activism ranging from armed struggle to literary expression these colonial subjects challenged and exploited promises in French Republican rhetoric that should have contradicted the continued use of slavery in the Americas and the introduction of exploitative labor in the colonization of Africa They defined an alternative French citizenship which recognized difference particularly race as part of a universal French identity Spanning Atlantic port cities in Haiti Senegal Martinique Benin and France this book is a major contribution to scholarship on citizenship race empire and gender and it sheds new light on debates around human rights and immigration in contemporary France

The French empire at War, 1940-1945 Martin Thomas, 2017-03-01 *The French empire at war* draws on original research in France and Britain to investigate the history of the divided French empire the Vichy and the Free French empires during the Second World War What emerges is a fascinating story While it is clear that both the Vichy and Free French colonial authorities were only rarely masters of their own destiny during the war preservation of limited imperial control served them both in different ways The Vichy government exploited the empire in an effort to withstand German Italian pressure for concessions in metropolitan France and it was key to its claim to be more than the mouthpiece of a defeated nation For Free France too the empire acquired a political and symbolic importance which far outweighed its material significance to the Gaullist war effort As the war progressed the Vichy empire lost ground to that of the Free French something which has often been attributed to the attraction of the Gaullist mystique and the spirit of resistance in the colonies In this radical new interpretation Thomas argues that it was neither of these The course of the war itself and the initiatives of the major combatant powers played the greatest part in the rise of the Gaullist empire and the demise of Vichy colonial control

and the Algerian War Daniele Joly,1991-04-19 **The End of Empire in French West Africa** Tony Chafer,2002-06-01 In an effort to restore its world power status after the humiliation of defeat and occupation France was eager to maintain its overseas empire at the end of the Second World War Yet just fifteen years later France had decolonized and by 1960 only a few small island territories remained under French control The process of decolonization in Indochina and Algeria has been widely studied but much less has been written about decolonization in France s largest colony French West Africa Here the French approach was regarded as exemplary that is a smooth transition successfully managed by well intentioned French politicians and enlightened African leaders Overturning this received wisdom Chafer argues that the rapid unfurling of events after the Second World War was a complex piecemeal and unpredictable process resulting in a successful decolonization that was achieved largely by accident At independence the winners assumed the reins of political power while the losers were often repressed imprisoned or silenced This important book challenges the traditional dichotomy between imperial and colonial history and will be of interest to students of imperial and French history politics and international relations development and post colonial studies Decolonization and African Society Frederick Cooper,1996-08-28 This detailed and authoritative volume changes our conceptions of imperial and African history Frederick Cooper gathers a vast range of archival sources in French and English to achieve a truly comparative study of colonial policy toward the recruitment control and institutionalization of African labor forces from the mid 1930s when the labor question was first posed to the late 1950s when decolonization was well under way Professor Cooper explores colonial conceptions of the African worker and shows how African trade union and political leaders used the new language of social change to claim equality and a share of power This helped to persuade European officials that the modern Africa they imagined was unaffordable Britain and France could not reshape African society As they left the continent the question was how they had affected the ways in which Africans could reorganize society themselves True France Herman Lebovics,1992 A history of the conservative static intolerant understanding of French identity during the first half of the century when it became a powerful tool of national politics Lebovics history State U of New York weaves into the narrative biographies of the politicians and social scientists who took part in the movement Annotation copyright by Book News Inc Portland OR **The French empire between the wars** Martin Thomas,2017-03-01 By considering the distinctiveness of the inter war years as a discrete period of colonial change this book addresses several larger issues such as tracing the origins of decolonization in the rise of colonial nationalism and a re assessment of the impact of inter war colonial rebellions in Africa Syria and Indochina The book also connects French theories of colonial governance to the lived experience of colonial rule in a period scarred by war and economic dislocation *Twentieth-century Colonialism and China* Bryna Goodman,David S. G. Goodman,2012 Colonialism in China was a piecemeal agglomeration that achieved its greatest extent in the first half of the twentieth century the last edifices falling at the close of the century The diversity of these colonial arrangements across

China's landscape defies systematic characterization. This book investigates the complexities and subtleties of colonialism in China during the first half of the twentieth century. In particular, the contributors examine the interaction between localities and forces of globalization that shaped the particular colonial experiences characterizing much of China's experience at this time. In the process, it is clear that an emphasis on interaction, synergy, and hybridity can add much to an understanding of colonialism in Twentieth Century China based on the simple binaries of colonizer and colonized, of aggressor and victim, and of a one-way transfer of knowledge and social understanding. To provide some kind of order to the analysis, the chapters in this volume deal in separate sections with colonial institutions, hybridity, colonialism in specific settings, the social biopolitics of colonialism, colonial governance, and Chinese networks in colonial environments. Bringing together an international team of experts, *Twentieth Century Colonialism and China* is an essential resource for students and scholars of modern Chinese history and colonialism and imperialism.

South East Asia, Colonial History: Empire-building in the nineteenth century Paul H. Kratoska, 2001. The six volumes that make up this unique set provide an extensive overview of colonialism in South East Asia. In the majority of cases, authors chosen were specialists writing about their individual areas of expertise and had first-hand experience in the region. Outline of contents: I Imperialism before 1800. Edited by Peter Borschberg. II Empire Building in the Nineteenth Century. III High Imperialism. IV Imperial Decline. Nationalism and the Japanese Challenge. V Peaceful Transitions to Independence. VI Independence through Violent Struggle.

Anticommunism in French Society and Politics, 1945-1953 Aaron Clift, 2023-06-20. *Anticommunism in French Society and Politics 1945-1953* evaluates the prevalence of anticommunism among the French population in 1945 to 1953 and examines its causes, character, and consequences through a series of case studies on different segments of French society. These include the scouting movement, family organisations, agricultural associations, middle class groups, and trade unions, and other working class organisations. Aaron Clift contends that anticommunism was more widespread and deeply rooted than previously believed and had a substantial impact on national politics and on these social groups and organisations. Furthermore, he argues that the study of anticommunism allows us a deeper understanding of the values they regarded as the most important to defend. Although anticommunism was a diverse phenomenon, this work identifies common discourses, including portrayals of communism as a threat to the nation, the colonial empire, the traditional family, private property, religion, the rural world, and Western civilisation. It also highlights common aims, such as the rehabilitation of wartime collaborators, and tactics, such as the invocation of apoliticism. While acknowledging the importance of the Cold War, it rejects the assumption that anticommunism was an American import or foreign to French society and demonstrates links between anticommunism and anti-Americanism. It concludes that anticommunism drew its strength from the connection or even conflation of communism with perceived negative social changes that were seen to threaten traditional French civilisation, interacting with the postwar international and domestic environment and the personal experiences of individual anticommunists.

The Precarious

Balance Donald Rothchild, Naomi Chazan, 2019-06-26 Since independence the political institutions of many African states have undergone a process of consolidation and subsequent deterioration. Constrained by external economic dependency and an acute scarcity of economic and technical resources, state officials have demonstrated a diminished capacity to regulate their societies. Public policies are agreed upon but ineffectively implemented by the weak institutions of the state. Although scholars have analyzed the various facets of state building in detail, little systematic attention has been given to the issue of the decline of the state and mechanisms to cope with state ineffectiveness in Africa. This book focuses especially on the character of the postcolonial state in Africa, the nature of and reasons for state deterioration, and the mechanisms and policies for coping with state malfunction. Scholars from Africa, the United States, Europe, and the Middle East combine a broad understanding of African political processes with expertise on specific regions. Their analytic and comparative perspective provides a comprehensive and timely treatment of this vital and heretofore neglected theme in African politics. **European Decolonization** Martin Thomas, 2017-05-15 This collection brings together twenty-one key articles that explore the nature and impact of colonial withdrawal. Ranging across all the European colonial powers, the articles discuss various aspects of decolonization, including the role of political violence, changing popular attitudes to empire, and the interactions between colonial conflict and Cold War. **South East Asia: Colonial Hist V2** Paul Kratoska, 2021-12-16 The six volumes that make up this set provide an overview of colonialism in South East Asia. The first volume deals with Portuguese, Spanish, and Dutch Imperialism before 1800; the second with empire building during the Nineteenth Century; and the third with the imperial heyday in the early Twentieth Century. The remaining volumes are devoted to the decline of empire, covering nationalism and the Japanese challenge to the Western presence in the region, and the transition to independence. The authors, whose works are anthologised, include both official participants and scholars who wrote about events from a more detached perspective. Wherever possible, authors have been chosen who had first-hand experience in the region. The Imperialism of French Decolonisation Ryo Ikeda, 2016-01-12 This book examines French motivations behind the decolonisation of Tunisia and Morocco and the intra-Western Alliance relationships. It argues that changing French policy towards decolonisation brought about the unexpectedly quick process of independence of dependencies in the post-WWII era.
