The Foreign Policies Of The French Left Simon Serfaty, 2019-07-11 The essays included in this volume were written for a series of seminars which took place at the Washington Center of Foreign Policy Research of the Johns Hopkins School of Advanced International Studies Held at a time when a victory of the Left was widely expected in the legislative elections of March 12 and 19 1978 the series reflected the Center's continuing interest in the changing international environment of American foreign policy As it is well known such predictions did not come to pass Yet these essays revised and updated remain eminently useful for reasons which should become all too evident in the pages that follow

Europeanization on the EU member states The various chapters based on cutting edge research examine the impact of the EU on national court systems territorial politics societal networks public discourse identity and citizenship norms The European Union the authors find does indeed make a difference even in Germany France and the United Kingdom In many cases EU rules and regulations incompatible with domestic institutions have created pressure for national governments to adapt This volume examines the conditions under which this adaptational pressure has led to institutional change in the member states

European Integration Since the 1920s Mark Hewitson, 2024-10-14 Brexit populism and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration This book re-examines why the European Union and its forerunners were created and investigates how and why they have changed It links contemporary events to historical explanation arguing that there were long term sets of conditions dating back to the 1920s which pushed European governments to cooperate economically and to try to resolve their diplomatic differences The failure of the French and German governments to create what Aristide Briand had called a European federal union demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states After 1945 the unexpected advent of a Cold War and the military diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional integration but they also placed limits on European governments activities as did disagreements between political parties and the expectations of citizens As a consequence supranational bodies such as the European Commission have been accompanied and often overshadowed by intergovernmental institutions such as the European Council with the EU as a whole functioning in important respects as a type of confederation The volume addresses a series of large scale historical questions which are integral to an understanding of the European Union It asks how and why citizens of member states have identified with the EU how matters of security affected the development of the European Community during and after the Cold War whether economic and social convergence have taken place and with what consequences and why European institutions have come to function as they have The study is thematic focusing on the most important aspects of European integration and explaining why member states have decided to carry out or have consented to the unique experiment of the European Union
