The Justification of War and International Order Lothar Brock, Hendrik Simon, 2021-02-11 The history of war is also a history of its justification The contributions to this book argue that the justification of war rarely happens as empty propaganda While it is directed at mobilizing support and reducing resistance it is not purely instrumental Rather the justification of force is part of an incessant struggle over what is to count as justifiable behaviour in a given historical constellation of power interests and norms This way the justification of specific wars interacts with international order as a normative frame of reference for dealing with conflict The justification of war shapes this order and is being shaped by it As the justification of specific wars entails a critique of war in general the use of force in international relations has always been accompanied by political and scholarly discourses on its appropriateness In much of the pertinent literature the dominating focus is on theoretical or conceptual debates as a mirror of how international normative orders evolve In contrast the focus of the present volume is on theory and political practice as sources for the re and de construction of the way in which the justification of war and international order interact With contributions from international law history and international relations and from Western and non Western perspectives this book offers a unique collection of papers exploring the continuities and changes in war discourses as they respond to and shape normative orders from early modern times to the present

The Terror David Andress, 2006-12-26 For two hundred years the Terror has haunted the imagination of the West The descent of the French Revolution from rapturous liberation into an orgy of apparently pointless bloodletting has been the focus of countless reflections on the often malignant nature of humanity and the folly of revolution David Andress a leading historian of the French Revolution presents a radically different account of the Terror The violence he shows was a result of dogmatic and fundamentalist thinking dreadful decisions were made by groups of people who believed they were still fighting for freedom but whose survival was threatened by famine external war and counter revolutionaries within the fledgling new state Urgent questions emerge from Andress s reassessment When is it right to arbitrarily detain those suspected of subversion When does an earnest patriotism become the rationale for slaughter This
