Romanticism and the Human Sciences Maureen N. McLane, 2000-09-14 This study published in 2000 examines the dialogue between Romantic poetry and the human sciences of the period Maureen McLane reveals how Romantic writers participated in a new found consciousness of human beings as a species by analysing their work in relation to discourses on moral philosophy political economy and anthropology Writers such as Wordsworth Coleridge Mary Shelley and Percy Shelley explored the possibilities and limits of human being language and hope They engaged with the work of theorists of the human sciences Malthus Godwin and Burke among them The book offers original readings of canonical works including Lyrical Ballads Frankenstein and Prometheus Unbound to show how the Romantics internalised and transformed ideas about the imagination perfectibility immortality and population which so energised contemporary moral and political debates McLane provides a defence of poetry in both Romantic and contemporary theoretical terms reformulating the predicament of Romanticism in general and poetry in particular **Buried Communities** Kurt Fosso, 2004-01-01 Offers an explanation for

the poet's mysterious and longstanding preoccupation with death and grief *Annual Bibliography of English Language and Literature*, **A Bibliography of Thomas Gray, 1917-1951** Herbert W. Starr, 2017-01-31 This book is a volume in the

**Acts** G. Rousseau, 2004-11-02 These essays demonstrate the sweeping influence of the human nervous system on the rise of literature and sensibility in early modern Europe The brain and nerves have usually been treated as narrow topics within the history of science and medicine Now George Rousseau an international authority on the relations of literature and medicine demonstrates why a broader context is necessary The nervous system was a crucial factor in the rise of recent civilization More than any other body part it holds the key to understanding how far back the strains and stresses of modern life fatigue depression mental illness extend *Death, Religion, and the Family in England, 1480-1750* Ralph Anthony Houlbrooke, 2000

The interest and importance of the social history of death have been increasingly recognized during the last thirty years Ralph Houlbrooke examines the effects of religious change on the English way of death between 1480 and 1750 He discusses relatively neglected aspects of the subject such as the death bed will making and the last rites He also examines the rich variety of commemorative media and practices and is the first to describe the development of the English funeral sermon between the late Middle Ages and the eighteenth century Dr Houlbrooke shows how the need of the living to remember the

dead remained important throughout the later medieval and early modern periods even though its justification and means of expression changed

**Royalism, Print and Censorship in Revolutionary England** Jason McElligott, 2007 A study of the content and methods of royalist propaganda via newsbooks in the crucial period following the end of the first civil war This is a study of a remarkable set of royalist newsbooks produced in conditions of strict secrecy in London during the late 1640s It uses these flimsy ephemeral sheets of paper to rethink the nature of both royalism and Civil War allegiance Royalism Print and Censorship in Revolutionary England moves beyond the simple and simplistic dichotomies of absolutism versus constitutionalism In doing so it offers a nuanced innovative and exciting vision of a strangely neglected aspect of the Civil Wars Print has always been seen as a radical destabilizing force an agent of social change and revolution Royalism Print and Censorship in Revolutionary England demonstrates by contrast how lively vibrant and exciting the use of print as an agent of conservatism could be It seeks to rescue the history of polemic in 1640s and 1650s England from an undue preoccupation with the factional squabbles of leading politicians In doing so it offers a fundamental reappraisal of the theory and practice of censorship in early modern England and of the way in which we should approach the history of books and print culture
